RULING

TO PUT ON needed flesh, no mat-ter how you've lost it, take Dr. Pierce's Golden Medical Dis-covery. It works wonders. By restor-ing the normal ac-tion of the deranged organs and functions, it builds the flesh up to a safe and healthy standard—premptly.

it builds the flesh up to a safe and healthy standard—promptly, pleasantly and naturally. The weak, emaciated, thin, pale and puny are made strong, plump, round and rosy. Nothing so effective as a strength restorer and flesh maker is known to medical science; this puts on healthy flesh not the fat of cod liver oll and its fifthy compounds. It rouses every organ of the body to activity, purifies, enriches and vitalizes the blood so that the body feels refreshed and strengthened. If you are too thin, too week, too nervous, it may be that the food sainfalation is at fault. A certain amount it bile is necessary for the reception of the fat foods in the blood. Too often the liver holds back this element which would help digestion. Dr. Pierce's Golden Medical Discovery stimulates, tones up and invigorates the liver, nourishes the blood, and the nuscles, stomach and nerves get the rich blood they require.

THE MARRYING AGE.

EFFECT OF MARRIAGE ON THE DEATH RATE OF INFANCY.

Both the Bride and Bridegroom May Be Over Thirty and Under Fifty With Advantage - Herr Korosi Has Deduced

a child as the marriage of its father and

tistical department at Buda-Pesth and al-ready well known for the importance and accuracy of the conclusions he has arrived at from statistical inquiries in other fields, that we are indebted for the discovery of this new factor in determining the welfare of the human race. The results which he obtained from a casual examination some 10 years ago of the relations existing between Happy Life of the Novelist at His Country the mortality of children and the various ages at which their parents were married were so striking that they induced him to H. Rider Haggard, the novelist who wrote "She" in six weeks and was re-warded by worldwide fame and a comfort-able fortune, has found more terrors con-

has been careful to ascertain, whenever the death of a child was registered, the ages of its father and mother, as well as that of the child and the cause of its death. He has noted in all 29,813 separate cases, which, in making his deductions, he divides into two distinct classes, the deaths caused by hereditary discuses and the deaths caused by dis-cuses which were contracted after birth. The former class is manifestly of the great-

ly more instrumental than that of the fa-ther in its effect upon the child Herr Korosi by as many acres as it has seen years. It is a quaint, picturesque place and just the has compiled his first table on the results gained from observations of the mother's

NEVER IDLE

"A million people out of work," says a newspaper, writing of these hard times Added to this misfortune are the physical infirmities with which thousands have to bear. But there is one thing that is never bear. But there is one thing that is never idle; always at work, unceasingly in search of those thus deterred, it seeks to cure such and help them to grasp a chance when it comes. This is the mission of St. Jacobs Oil. Among the millions there are thousands suffering with neuralgia. For this it is a positive cure. Use it and there will be a thousand sufferers less and a thousand chances more to get work and hold it. Better times may soon come and there is nothing like the great remedy for pain to help you out of painful troubles and into place again.

Training a Cat. Cats can be trained to almost anything it taught when they are young. We have a number of Persians, which sit with equanimity upon the top of our bird cages watching the canaries hopping merrily about from perch to perch, making no attempt to touch them, nor ever dreaming of inserting murmurs found the minister wholly unprepared.

He had gone into the pulpit intending to
speak about the need for charity and was
wholly unconscious of what he had done.

Convinced at length by testimony which

Appalling Depths of Space. two hours to save a nickel, nor of bringing the wrath of the salesman down on their defenseless heads by their indecisions and their blocking the way.

It was amusing to notice with what satisfaction one salesman took a slight revenge in times around the earth in a second, and if a telegraphic message could be sent to the moon it would reach its destination in a little more than a second. It would take some-thing like eight minutes to arrive at the sun, but how long did they think it would take to get to Alpha Centauri, traveling thither at 180,000 miles a second? Seconds, minutes, hours, days, weeks, months, would not be long enough. It would not take less than three years, traveling all the time at that tremendous pace, before it would reach

its destination If that was the case with respect to the nearest of the stars, what must be said of those which were farther off? There were stars so remote that if the news of the vic tory of Wellington at Waterloo had been flashed to them in 1815 on that celestial telegraph system it would not have reached them yet, even if the message had sped at the pace which he had indicated and had

been traveling all the time.

Nay, more, if the glad tidings of that first
Christmas in Bethlehem 19 centuries ago
had been disseminated through the universe, there were yet stars of which astron omers could tell them plunged into space in depths so appalling that even the years that have elapsed since that event would not have been long enough for the news to reach them, though it traveled at a speed of 180,000 miles in every second.

LIFE OR DEATH?

It is of vital importance that it should be understood by persons whose kidneys are inactive that this condition of things is finally inductive of a state of the organs where life hangs in the halance. Bright's disease, diabetes, albuminuria are all diseases of a very obstituate character in their mature singe, and all have a fairly tendency. They often buffle the most practiced medical skill and the most approved remedi s of materia me lea. But opposed at the outset—that it is to say, when the kidneys begin to discharge their functions inactively—with Hostetter's tomach litters, the dangerous tendency is che-ked. Very useful also is this household med cine for those aliments of common occurrence constipation, idilousness, dyspepsia and nervousness. It is a safeguard against malaria, and averts chronic rheumatism.

"Do you hat? me?" he faltered. "This is a sudden," she rejo ned in confusion. And so they were divorced.

SAFE, SURE AND SPEEDY.

No external reme ty ever yet devised has so fully and unquestionably met these three prime conditions as successfully as ALLCOCK'S POROUS PLASTERS. They are safe because they contain no deleterious action because they contain no deleterious drugs and are manufactured upon scientific principles of medicine. They are sure because nothing goes into them except ingredients which are exactly adapted to the purposes for which a plaster is required. They are speedy in their action because their medicinal qualities go right to their work of relieving pain and restoring the natural and healthy performance of the functions of muscles, nerves and skin. Ask for Allock's, and do not be induced to accept a substitute.

FOR LADIES! \$100 IN GOLD will be paid by the Koch Chemical Co. for any case of female weakness that will not yield to DR. J. S. KOCH'S ANTI-SEFTIC SANATIVER POWDER. Price \$1.00 per box. For sale by all druggists. A World's Tribute.

America Leads the Nations in the March of Progress.

Among the wonders of the World's Columbian Fair the grandest was the exhibit of American products. The Exhibition was, in this respect, an object lesson of the grandeur and glory of the Republic. Among the exhibits from the United States no article of its class stood so high as

Dr. Price's Cream Baking Powder.

The Chief Chemist of the Agricultural Department at Washington, backed by an intelligent jury at the Exposition, found it strongest in leavening power, peerless in its purity and beyond comparison in uniform excellence.

Received Highest Award At the World's Fair.

The award is a matter of official record.

Nothing could settle so decisively the immeasureable superiority of Dr. Price's over all other powders as the great honor hestowed at Chicago.

When Cornered for Luncheon, LEWIS & DRYDEN'S MARINE HISTORY "If you ever get in a corner and seem to ave nothing available in the house for incheon, just investigate the resources of the cracker box," said a careful house-keeper. "I remember one day we had a guest come in just before luncheon was guest come in just before luncheon was served. It was a sort of off day, and we had a spread made up of odds and ends. The visitor was one whom I knew to be somewhat dainty in her tastes, and as there was no time to send to market for anything I just didn't know what to do. Unfortunately the bread wasn't fresh, which was accept mischange for the product of the pro was a great misfortune, for it always seems to me that with good bread and butter one can make out a sort of a meal; but here we were, when it all at once occurred to me that we might get up a creditable dish out

of crackers, of which, as good luck would have it, there was an abundance. "So I buttered a few dozen crackers and set them in the oven, there to stay until they were a light brown. A part of these were placed in a dish on the back of the stove, and with the remainder I made some cracker sandwiches out of some bits of roast fowl which was ready sliced in the pantry. The meat was mixed with a little mayonnaise and placed between two of the buttered crackers. A jar of canned fruit was opened, and with some olives and a bit of cheese rounded out a very relishable

luncheon, and my guest quite enthused over the new fashioned sandwiches."—New York Ledger. Worked a Problem While Asleep.

An Amsterdam banker once reque professor of mathematics to work out a very intricate and puzzling problem for him. The professor, thinking the matter good exercise for the intellectual faculties of his pupils, mentioned it to them and re-quested them to work out the enigma. One of the students, who had pondered deeply over the intricate subject during the day, retired to bed. Some time afterward he arose, dressed, and seating himself at his deak worked out the problem accurately, covering sheets of paper with his calculations. He had no recollection in the morning of having done so.—Boston Globe

The mortality of young children is yearly decreasing. The decrease is ascribed to various causes. Some say that it is due to progressive improvement in the human race. Others attribute it to an increase of the young.

race. Others attribute it to an increase of proper precaution in the care of the young. Still others contend that the cause of fewer deaths among children is to be found in no longer permitting them to eat unsuitable food and to wear unsuitable clothing.

Few infer from the present rate of mortality that the marriages of parents have been made at more proper ages. Yet investigation by scientific men has proved that if hereditary diseases be excepted there is nothing so dangerous to the life of a child as the marriage of its father and

mother at certain ages.

It is only recently that any inquiry into this subject has been undertaken. But the results which have thus far been obtained are such as to show that men and women must marry at particular stages of their lives if their offspring is to be mentally and physically sound.

It is to Herr Korosi, the head of the sta-

make a more exhaustive investigation.

For the past 10 years, therefore, Dr. Korosi

est importance for his purpose.

As the condition of the mother is evident-

ing to statistics, more liable to bear sickly

whose mothers were married between 30 Concerning deaths due to tuberculosis

mornings are spent in looking after the affolia of his farm or in shooting. He is an excellent marks non and is quite a picture sque figure as he strolls through his game preserves clad in a brown shooting his cheef and kniekerbookers and with his table of creater leaves, to the same extent, its impress on his children. He has accordingly prepared a his children. He has accordingly prepared a his children was a woman standing at the next leaves, to the same extent, its impress on his children. He has accordingly prepared a his children was a woman standing at the next leaves, to the same extent, its impress on his children. He has accordingly prepared a his children was a woman standing at the next leaves, to the same extent, its impress on his children. He has accordingly prepared a from his porch, and going toward the curb-
