The following story, undoubtedly true(?), comes from a Medford correspondent: "Seven years ago a farmer living west of this city hung his vest on a fence in the barn yard, and as a result of it a wonderful story is told. Last week the animal, a staid old milch cow, was butchered for beef and the time-piece was found in such a position between the lungs of the cow that the process of respiration, the closing in and filling of the lungs kept the stemwinder wound up, and the watch has lost but four minutes in the seven years.—Republican.
