Captain W. W. Harts, United States engineer, returned last evening from a ten days' tour of inspection of the government works along the coast. He visited Yaquina bay, Siuslaw, Coos bay and the works on the Coquille river. At Yaquina bay Captain Harts reports the troublesome rock in the channel on which work has been in progress for three months, is no longer an element of danger. This rock, which is pinnacle in form, was about 60 feet long and 12 feet in width. Through the use of about two tons of dynamite this rock has been cut down so that there is now about 13 feet of water over it at low tide, and 20 and 21 feet at high tide. Work upon the obstruction was stopped by the stormy weather, but will be resumed next season in the event that further work is needed. The jetty at Yaquina bay, instead of being beaten down, as was reported, was found in good order. Although some of the false work has been torn down, as was expected, the rock work, which alone is of value, is in excellent shape, and up to the required level its entire length. From sea faring men, who make Yaquina bay, Captain Harts learned that the government works at this place could not give better satisfaction.—Portland Telegram.

## LOVELY SILETZ.

If you haven't seen Siletz, you haven't seen it all. THE LEADER force paid its first visit to the Siletz Agency Sunday and Monday. The weather was perfect, and the beautiful landscape and handsome buildings made a scene worthy of the brush of the world's greatest artist. A trip of inspection through the several apartments of the boarding school, under the escort of Mrs. M. E. Peairs, the efficient matron, and Prof. Bert R. Betz, the able chief instructor, were appreciated. The hospital was also visited. Miss E. M. Dyer, the skillful nurse in charge, stated that no patients were then in the hospital. Fred Chambers has been there for treatment recently, but he is reported among the convalescents. Everything about these buildings is conveniently arranged and kept scrupulously clean. The employees all seemed to be busy and earning their salaries, but, as we intimated before, business is a little slow at the hospital. Agent Buford, the man at the helm, sat in his office with becoming patience and dignity while numerous citizens appeared before him to make all their wants and wishes known—which were not a few. Clerk Brown plied between the office and the commissary in answer to requisitions for supplies and did more or less wrestling with figures. Dr. Daniel was at his post, ready for calls, of course, but not soliciting. Samuel Center, the industrial teacher, was overseeing and assisting in making repairs to the water system. The beautiful, fertile valley alone seemed to be lazy—in spots. It did seem that more of those fine farms should be in a high state of cultivation and doing business every month in the year, but perhaps that is impracticable. Siletz is also very attractive socially. It abounds in sweet singers, fine musical instruments and royal entertainers. Good music was a feature of the Sunday services conducted by Rev. E. H. Bryant, who is doing good work in that field. Just now, when the eyes of thousands of people in the east are turning toward Oregon, we feel it to be our solemn duty to again remark: If you don't see Siletz, you don't see it all. Nearly all the vacant land surrounding the Agency has recently been taken by homesteaders—men who are attracted by the beautiful Siletz river, the fertile soil, the grand timber—in fact, the almost limitless resources of the region that must be seen and studied to be appreciated.

Until further notice my appointments will be as follows: First Sunday of the month, Eddyville; second and fourth Sundays, Toledo; third Sunday, Yaquina, in the evening. Fifth Sundays at Toledo. Prayer meeting, Wednesday evening; Sunday school at 10 a. m.
