There Are 2400

Disorders incident to the human frame, of which a majority are caused or promoted by impure blood.

The remedy is simple.

Take Hood's Sarsaparilla.

That this medicine radically and effectively purifies the blood is known to every druggist, known to hundreds of thousands of people who themselves or by their friends have experienced its curative powers.

The worst cases of scrofula, the most agonizing sufferings from salt rheum and other virulent blood diseases, are conquered by it, while those cured of boils, pimples, dyspeptic and bilious symptoms and that tired feeling are numbered by millions.

KING OF ITALY.

He Is Possessed of Great Will Power and Many Acc mplishments.

From one who was intimately connected with him in his youth I learn that his chief characteristic is earnestness, added to great will power. Whatever he does, no matter how trivial, is attacked (I use the word advisedly) with such force and such determination that it is invariably carried to a successful "I now realize," said the pig, as they loaded him into the wagon, bound for the butcher's, "I now realize when a small boy he was playing in the garden of the Quirinal, and found a Pius IX, penny, with which he rushed delighted to Queen Margherita. She explained what it was, and incidentally told him about others more important. From that moment he began to collect, and he has now become one of the greatest numismatists in the world. It is the same with swimming. He learned quickly, and reached such perfection that it was his custom to jump from a man-of-war into the open sea, have his sing.

swim, and return without help. Other accomplishments are music and painting. Queen Margherita, who is exceptionally fond of music, seeing her husband so indifferent to it do her husband so indifferent to it, decided that her son must play at least the plano, if he had any talent at all. Masters were procured when he was a small boy, with the result that he is a very fair planist, and satisfies even such a good school, too! — Detroit of the United States. A Prosperous and Popular San Francisco Institution.

Institution. Among the institutions identified with the growth and development of San Francisco, Heald's Business College holds a conspicuous place. Both as a business enterprise and an educational institution, it has been ever since its organization, nearly forty years ago, ex-tremely popular and eminently successful. It is in the class of those solid and substantial in-stitutions in which a city takes pride. Citizens point to it as one of the old reliable and thor-oughly progressive establishments, an institu-tion with a definite purpose and an unques-tioned status. In connection with commercial education the name of Heald's is a household word on the Pacific Coast and throughout the country at large. In its own field of effort it is as widely known as Stanford or Berkeley, for it enrolls students from the four quarters of the globe. In 1809 every county in California but four had students in Heald's Business College. The four not represented were Del Norte, Lassen, Orange and Ventura. The register of the college shows that in 1800 students were enrolled from the following States and Trritories outside of Cal-fornia; in many cases there were several rep-resentatives from each: Nevada, Iowa, Wash-ington, Oregon, Montana, Colorado, Utah, Idaho, Arizona, Kansas, Missouri, Pennaylvania, New Arizona, Kansas, Missouri, Pennaylvania, New Jeo0 students came directly to the school from wexteo, Canada, Japan the Hawnilan Bilanda,

WOMEN OF THE UNITED STATES

They will generally reply, 'Oh, no, I never had catarrh. My nose is per-fectly clear, and my breath is not bad. I am not troubled with coughing or spitting, or any other disagreeable symptom of catarrn.' 'But, my dear madam, you may have catarrh all the same. Catarrh is not always located

in the head. You may have catarrh of the lungs, or stomach, or liver, or kid-neys and especially you may have catarrh of the pelvic organs." The doctor went on

to say: "I have been preaching this doc-trine for the last forty Eureka Springs, Ark, oured of a se-vast multitude of by Feuna. women who have never heard it yet.

THE SWIFT SPECIFIC CO., ATLANTA. GA.

successor. It is interesting to note that only three predecessors have stood between the late Grand Master and the last Prince of Wales who filled that office. namely, Lord Ripon, who held the position from 1870 to 1874; the Earl of the Zetland, who occupied it from 1844 to 1870; and the Duke of Sussex, 1813 to 1843, who succeeded the Prince Regent.

His Prophecy Came True. Edward Wigglesworth, "Hollis pro-

fessor of divinity at Cambridge," in a little pamphlet published in the portenrect idea of the prosperity of this country during the century just closing, as he predicted that the population of the "British American colonies" in 1900 would be \$0,000,000.

Included in this estimate was Nova Scotia, now the Dominion of Canada, which with its last recorded census result of 4.800.000 added to the 76,000,000 of the United States fulfills almost to the letter the accuracy of the Wigglesworth prophecy. And this somewhat remarkable forecast was not based upon any species of guess work, but upon a well defined and clearly constructed mathematical theory, which, reduced to plain words, can be best described in the language of its author:

"The British-Americans have doubled their numbers in every period of twenty-five years from their first plantation."

Taking this statistical fact as a basis for his calculations the Harvard divinity professor constructed a system of reckoning the increase of a country's population which history has shown to be as correct as his method was simple. Assuming that the 1775 population was 2.500,000 Mr. Wigglesworth estimated 5,000,000 for 1800, 10,000,000 for 1825, 20,000,000 for 1850, 40,000,000 for 1875 and \$0,000,000 for 1900, and the record of the United States census since its initial taking in 1790 shows substantially these figures, as follows: Census of 1800, 5,308,000; 1825 (1820). 9,633,000; 1850, 23,191,000; 1875 (1870). 38,658,000; 1900, with Canada, 81,000,-000 .- National Magazine.

Love never finds a burden too heavy for it to tackle.

900 students came directly to the school from lexico, Canada, Japan, the Hawaiian Islands, ukon Territory, Siberia and Central America. nrollments were also made from England and worden

Sweden. Its large body of alumni constitute a most formidable promoting force, and the steady growth of the college can be attributed largely to the communding volce of these thousands of graduates, who know whereof they speak. For full information write to the college for the S0-pare catalogue and concege fournals. Address E. P. Heald, President, 24 Post street, San Francisco, Cal.
