an obscure corner of the departmen
over which the man had presided where it had been wholly forgotten
No authentle likeness is known to ex ist of Major L'Enfant, who lald out the
clty of Washington. With the wonders
of modern photography it is hard to realize how serious a matter the mak
ing of President Ellot, of Harvard Unlver
sity, wll be regarded by football play ers in all the colleges of the country as their bitter enemy because of the
attack he has made on their game in will, however, be wrong. Enemy
though he be to some of the moder methods of the game, President Ehot
could not have done could not have done a more genuine
service to college sport than by speak
ing as he has ing any he hnse tepe professionalismo
many college teams and the exagger ated follies of football hero-worsh1 Ellot goes deeper in his analysis an
attacks the morals of the game. Foor bnll is now played, he tells. .s.,
though it were war. The stratagem though it were war. The stratagems
deceptions and brutalities of war are imary standards of honor and dishono
ner are forgotten in the "sclentiff" game.
Whatever argument may be made for Whatever argument may be made for
the use of deception and treachery in
war war, where the struggle is for life and
death, no argument at all can be made for similiar methods in a contest which
Is only for amusement. The game it is now played would be condemned
by the very statement of the charges nganast it, even if it had no harmiful erfect on the after ilves of its devotee
But since football tralining is a train ing that does not wear off, slnce the
football game sends many young me from the colleges forth into the busi-
nens world, there to wage ruthless business war and help to lower stand
ards that are already low enough as
is, the evll becomes one of the grea est importance. The untversities can-
not afford to let thetr students be tuenced for harm
this. On President Ellot's showing
they they must elther make the game be
come once more a "gentlemanly game" or they must banish it entirely. Eve
the more radical treatment if comes uecessnry, will be benefcinl to
genulne college sport, as well as to to genume college sport, as well
universities and the public.

Tl.e Value of the Ciassica.' -
Evangelclsm half a century ago, reflected in the letters of our ancestors,
was peculiarly liy, and of a kind to
freeze up the blib spirits of freeze up the high spirits of young
people. In 1850 a devoted mother wrote to
her boy, after he had gonie to paratory school "to fit for college," and
said" "I am glad you are reading Ylato
and Herodotus. Communing with the and Herodotus. Communing with the
dead, ou will learn how to de."
That was the worldilest sentiment in thls letter to a boy of fifteen, except
an injunction not to squander his monthly allowance of two dollars "in
foolish purchases of sweets and trivial knick-knacks."

In the Deep Sca
Statistlctians find that something like he sea every year, never to be heard human belngs and involving a money human belng and
loss of $\$ 100,000,000$.
We were told the revolution

it seems to have been led by Peter
Outsks.

Convenient Pig Pen Front. onvenient pig-pen front. The fee trough is securely fastened at the
front side of the pen, and the side or
wall of the pen is hinged at the top wall of the pen is hinged at the top
so ot will swing over the trougli. An
iron rod is passed through the bottom crosssppece and inserted in anothe
bole in elther cadge of the trough hole in elther edge of the trough.
When feeding, the rod ts lifted, th
gate swung gate swung back, and the rod is
dropped in the hole in the back elge
of the trough. To let the pligs eat, the of the trough. To let the plgs eat, th
gate is swung toward the feeder, nad
the rod pushed down into the hole outside edge of trough. Such an ar-

rangement will save much annoyance | and glve ench plg a chance to get hls |
| :--- |
| share of the meal. The fllustration |

shows the front swung back so th the feed can be put into the troughs.
Exchange. Exchange
Paris Green and Weevil.
That the boll weevil is not fields by the use of paris green is the conclusion of the Bureau of Entomol
ogy of the Department of Agriculture ogy of the Department of Agriculture
after extensive observations and ex after extensive observations and ex-
periments. This conclusion is based
upon the following facts: 1 . Persistent use of paris green from the time or chopplng until pleking (in some
cases as many as fitteen appllications)
has falled to materlally reduce has fniled to materlally reduce the
numbers of the weevils or to incrense the yteld. 2 . Careful exnmination or
very many experiments with the very many experiments with the poi-
son made by planters In Texas has
falled to reveal conclusive Instances of its suceessful use. 3. Reasons for
un the Impossibility of polsoulng weevils
successfully are to be found in the facts that only a very small percentthe squares are set upon the plants,
that they do not drink the dew on the hat they do not drink the dew on the
leaves at nlght, and that as soon ns squares are set all feeding is done
withln the shelter of the bract (shuck) beyond the reach of any pol
son that might be applled." son that might be applied."
Poet Puller. The post puller tllustrated is a
trong and durable one. It will pull ny fence post. The two uprights are 12xches and 3 feet long, mortised hick and braced. Bore a 1 -Inch hole
in upper end of uprights, in which

$\frac{\text { Effective post puller. }}{\text { asert a small pulley wheel. Take a }}$ chain, fasten a around lower end of to end of chain. By this device yon
can pull a more solid post than by hand.

Government Whitemash.
you ever expect to do any whiteIf you ever expect to do any white-
washing you had better cut thls our wasung you had better cut this out
nnd save it. The recipe is as follows:
Slake half a bushel of lime tin tollo Slake half a bushel of ilme in in bolling:
water, covering to keep in the stenin. Strain the luquid, and add a peck of
salt previously dissolved in warm wa ter, trevee pously dissolved ground rice bolled
to a thin paste and stirred in while to a thin paste and stirred in while
hot, one-halt pound Spanish whiting and one pound glue dissolved by soaisng in cold water and then hung over
slow fire tare add fine a gallons of of hot water,
stir well and let stand for soveral days coverell from dust. it is better applled bot.
Productive Island Farmas.
In some respects, American IIght take a lesson from those of the
Jerseny Itands Jersog Islands in the Engllsh Channel. pxpects to keep thirty cows, a large herd of swine, and employ five or six
men. The climate is very favorable men. The climate Is very favorable
for fodaer crops, but a part of the success of the Channel istand farming cess of the Channel
is owing to the excellent stock kept
and the care taken in saving manure
and tilling the land.

Ownrea want More Mon
A farm exchange say Where is reported that in some sections
ers are positively many hogs therio owners are positively refusing to take less
than 4 cents a pound for them on the
fan farm, and byyers are finding themselves "up agalnst a hard proposition,"
as they ut it, for the packers' price
witl ne will not allow the farm iprice de
manded. But it looks as if the farm-
ers are standling pat, judkling by the ers are standing pat, Judging by the
recelpts of hogs at the blg markets.
For tnatunce: or instance: For the week closing
with the writing of this the recelpts at Chicago alone were 62,000 heali,
ngainst 98,000 head the previous week,
nd 92,000 head the correapondt and 92,000 head the corresponding
week last year. It will not be neces. sary to keep up such light recelpts
more than a week or two to bring the packers to terms. And at this season
that much more feeding can doubtles be done without loss to the feeders. At all events, with reeding stuffs at helr present price, hoss cannot an
hould not be sold at less than 4 eents if cost of production
factor in the business.
Checking Root Gall.
When new apple trees are
from the nursery they should be care
fully fnspected to make sure that they are not affected with root gall. This
disense is now very prevelent disense is now very prevalent in some
nurserles, and great care must be exer clsed. It is a disease, that spread
hrough the soll, and a single the nay Introduce it into an orchard,
where it may undo the work of years. Where it may undo the work of years.
We have severnl tmes illnstrated mott
gall In these columns, and it does not seem adviseble to repeat the Cllustra-
tion at this time. Suffice it to say and any tree affected with a protub . Thne of this kind sioula be discarded
This is the first thing to be looked out
for in planting trees. The shape of the cor in planting trees. The shape of
tree is important. but it is less im the tree has a disense that will prove
deadly to itself and to other trees the same orchard.

Handy Farm Cart.
wheels made as shown in the 川llusty Wheels made as shown in the lllustra-
tion by using the rear wheels of an
old bugy with the old buggy with the axle clamped to
the frame by clamp bolts to be a nice

cart for almost any purpose, and es took the milk to the chesse factory when all the horses were in use.-H
F. Jahnke, in Iowa Democrat. Illinoin Farms Sell High.
Why do Illinois farm lands sell $\$ 125$ to $\$ 200$ an acre? Because they are productive. This year one Chris
tian County farmer gathered a feld or corn which yielded 119 bushels to the acre. The corn was sold for 37 cent,
a bushel, a gross return of $\$ 43$ per acre. Taking out the cost of a blg tia
the crop, there stlll remains a terest on the investment, even if the
and be valued at $\$ 200$ per acre. Wh land be valued at $\$ 200$ per acre. While
ylelds as large as this are exceptonal, hey are becoming more and mor
common. With improved seed and tm proved methods of culture, the aver
age $y$ ield on good tand is increasing
This is one of the reasons land This is one
going up.
Progress and Cont of Irrigation.
The Census Burenu has Issued a port on the condition of irrigation in
the United Stites In 1902, showing that 23,415 systems with 59,311 miles of Ing $0,487,077$ acres on 13,036 farmis The amount expended in constructing
all these systems was $\$ 33,320,452$. The nverage cost of construction per acr
in the arld reglon was $\$ 9.14$, and th average per irrigation system was $\$ 2$.
t10. The report says that the great 710. The report says that the great
obstacle to the development of irrigaton in Texas and New Mexico is the
present treaty between Mexico and this country, which prohllbts the im-
pounding of the waters of the Rio
Cold storage of Fruits.
The cold storage of frult has to large proportions, nearly $3,000,000$ barrels of apples having been stored in
the United states as a result of Inves tigations during the last year. It
found that the condition In which th fruit is grown and the manner of
handlling it determlue to a large extent its keeping quality and ultimate value The success of a Yew poultry grow-
ers has nttracted the attention of quita number of Florida farmers, wh
think the industry think the industry may prove an im
portant one in that State. Very few
of the natives understand the modern mettoods as practiced at the North particularly with regard to fighting
insect pests and diseases. The cltmati itself is asserted to be remarkably
favorable, so that chickens can be suc
ceusfally cessfally hatched and raised every
month in the year. nlttoongh from Oc
tobier to May is tober to May
profitable I me.

## 1. Science

Ball-playing seems to be physlologiy beyond feminine powers. After giris' college finds that a larger and wer-setting collarbone makes the
movement of the grl's arm less fre movement of the grl's's arm less freo
han that of the boy's, so that sho annot hope to throw well.
"Pneumatic lubrication" Is what
r. Carlo Del Lungo, of Genon, calls Dr. Carlo Del Lungo, of Genon, calls
his new phan for Increasing the speed ofships. It consists in reducing the
ensity of the surrounding water by pumplng air into it, creating a foamy
stratum tn which the stratum in whlch the vessel slips for-
ward agalnst greatly lessened resistward
ance.
A Norweglan englneer has recently
nvented a new apparatus for seal sonented a new apparatus for sea
sounding by which it is not necessary
to touch bottom by an acoustic method. The depths revolving drum. The operation of tho
device depends upon the time which device depends upon the time which
soond takes to travel to the bottom the time thus gives the depth to which the exploring applaratus is lowered. persons from the electric current uph the rupture of a trolley wire has been
invented recently. By the employment of this arrangement the current is cut off and the wire rendered barmless.
The device is fitted to each section of the wire and consists of an ordinary
connecting ear held in Its proper sition by the stralin on the trolley wire.
As soon as this tension ts releasel. As soon as this tenslon ts released.
as by the breaking of the trolley wire, the current is Immediately cut
of at the broken section without any "shorting" kparks whateve
