Cruise the Timber.

Why are the timber lands assessed per acre?

That is the question and now is the logical time for the people to look into this matter.

Mind you, this paper is not accusing any official of being corrupt, but simply strikes at the plan or methods in vogue at this time.

Follow this carefully and see if you do not agree with us.

Upon what system of valuation have the thousands of acres of timber lands in Curry county been purchased by foreign corporations? You all know that not a solitary timber claim has been purchased only after careful cruising and estimating, and the valuation was governed by result of that cruise. That was, and is, the system used by the capitalist in dealing with the owner.

Now, how did the Assessor get at his valuation? Did he cruise the land or did he take some man's say so as to the selling p ice? How far from the actual cash value did the Assessor come, and how does he know whether the figures he hears about or sees upon the deeds are the actual figures or not?

Who of all people should know the result of careful cruising and estimating of the timber of this county but the county board? Why has not that body made it its own business to send a cruiser and estimator over the timber lands of this county and see that the owners pay taxes upon a valuation per thousand feet? A majority of the timber of Curry county is held by foreign speculators. When the time is ripe this timber will be cut and shipped away. The stumps, rocks and mountains will remain. The value will be gone. Whether there will be enough value left to justify the owners in paying any tax whatever will be problematical. The chances are the majority of it will be sold for taxes and much of it the county will be compelled to bid in. Then why are these immense values allowed to grow in size now and bear but a small part of the burden while the resident digs to pay a tax much greater? The resident is the one who improves the county. It is he who builds the houses, plants the orchards and develops the country to the point where the railroad builder takes notice. When the railroad comes, the speculator has made his millions, and with no effort. He has not lived in the wilderness. He has not kept his children away from the splendid city educational facilities. He has not swung his axe, felled the trees and grubbed the stumps. He has not made two blades grow where but one grew before, but he has reaped a thousand blades where he never did sow. He has enjoyed his luxurous home and comfortable surroundings while the resident plodder has performed the labor which increased the value of the things in which the capitalist speculated with a few paltry dollars.—The (Curry County) Radium.

Prof. H. A. Howell, of Havana, Cuba, Recommends Chamberlain's Cough Remedy

"As long ago as I can remember my mother was a faithful user and friend of Chamberlain's Cough Remedy, but never in my life have I realized its true value until now," writes Prof. H. A. Howell, of Howell's American School, Havana, Cuba. "On the night of February 3d our baby was taken sick with a very severe cold, the next day was worse and the following night his condition was desperate. He could not lie down and it was necessary to have him in the arms every moment. Even then his breathing was difficult. I did not think he would live until morning. At last I thought of my mother's remedy, Chamberlain's Cough Remedy, which we gave, and it afforded prompt relief, and now, three days later, he has fully recovered. Under the circumstances I would not hesitate a moment in saying that Chamberlain's Cough Remedy, and that only, saved the life of our dear little boy." For sale by O. O. Krogstad.
