

Ask Your Own Doctor

If he tells you to take Ayer's Cherry Pectoral for your severe cough or bronchial trouble, then take it. If he has anything better, then take that. But we know what he will say; for doctors have used this cough medicine over 60 years.

"I have used Ayer's Cherry Pectoral for hard colds, bad coughs, and influenza. It has done me great good, and I believe it is the best cough medicine in the world for all throat and lung troubles."—ELI C. STUART, Albany, Oregon.

Keep the bowels open with one of Ayer's Pills at bedtime, just one.

A Concerted Broadside.
When those twenty-six pianola pianos on board the big fleet are banging away at the same time it will take a nervy enemy to stand up and face the concerted broadside.—Cleveland Plain Dealer.

Futile Wisdom.
"What your husband doesn't know about race horses," said the friend of the family, "isn't worth knowing."
"Yes," answered young Mrs. Torkins; "and what Charlie does know about them isn't worth knowing, either."—Washington Star.

Only One "BROMO QUININE."
That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the World over to Cure a Cold in One Day. 25c.

He Was Willing.
In the morning mail the busy editor found the following letter written on a postal card: "Dear Sir: I have just graduated from a correspondence school of journalism. Would you like to have me write for your paper? J. Alexander McNutt."

Seizing his trusty pencil, the busy editor dashed off the following in reply: "Dear J. Alex: Certainly we would be pleased to have you write for our paper. Kindly address your letter to the circulation manager and inclose the regular subscription price."

WEST IS ADVANCING.

President Bryan Compares Schools With Those of Europe.

President E. A. Bryan, of the Washington State college, has returned from his tour of the European capitals, and at present is preparing a series of lectures, the subjects of which he gathered while abroad. President Bryan's trip was something in the nature of an investigation of modern education, both technical and classical, as found in the most advanced and greatest educational institutions of nations. Before leaving America he visited several of America's most famous institutions, and both in England and on the continent called at the world's best known centers of learning. His conclusions were recently stated as follows:

"I believe the time is not remotely distant when the educational institutions of the West, meaning the western part of the United States, will be fully as efficient, and as famed as the best universities and colleges of the old world. The tremendous fund of natural wealth in Western states, the rapid development now in progress, the geographical position with reference to the new commercial empire of the Pacific, and the wide-awake nature of Western people make these things certain. Never again will men have a Western frontier to look to when seeking new homes for the expansion of new ideas. Humanity has made its path around the globe, and now, at the journey's end, the Pacific coast, must there be an up-building, and intensive, rather than extensive, development of all institutions. What this means to the people of the West they do not at present fully comprehend. But the progress of events nowadays is very rapid, and the work of these new forces will be evident within only a few years."

Old Superstition Refuted.

By J. L. Ashlock, Washington State College, Pullman.
The results of an experiment, which for the past fifteen years has been in progress at the state experiment station, completely refutes the old superstition that a cold January and February is apt to be followed by a warm March and April, or that one year of an average low temperature is apt to be followed by a year in which the temperature will average higher.

Professor George Severance now has the compilation of the weather data in charge, and states the summarization of results as follows:

"For the past fifteen years the experiment station has kept a close record of the temperature of each day of the year, striking an average between the temperature of morning and evening, which we call the 'mean temperature.' Having kept the record for a month the custom has then been to get the average 'mean' for the entire month. In this way we have compared the temperatures of each period of January and February with the temperature of the following March and April periods for the past fifteen years, and we find that the variations from the rule for determining what the temperature of spring will be by the temperature of winter, of one year by averaging the temperature of another, are so frequent that it is proved that the weather of one year or month, or several months, is absolutely no index to what subsequent temperatures will be."

Agricultural Club at Idaho University

By J. H. Franson, Idaho Experiment Station, Moscow

The formation of an Agricultural club on the 19th of December marked an important event in the history of the agricultural department of the university of Idaho. The club is intended to promote a more lively feeling towards agricultural work among the students, and to interest the farmers of the state in the college. Several methods will be used in carrying out this work, the principal one of which will be the publishing of a magazine known as the Idaho Student Farmer. The first and only number of the present scholastic year will be published in a short time. Beginning next fall a quarterly will be printed. This magazine will take up subjects of the utmost interest to farmers and to agricultural students. Your name and 10 cents to cover postage sent to the Idaho Student Farmer, University of Idaho, Moscow, will secure a copy of the first number.

Of Interest to Farmers.

The following publications of interest to farmers and others have been issued by the Agricultural department of the Federal government and will be furnished free, so long as they are available, except where otherwise noted, upon application to the Superintendent of Documents, Government Printing Office, Washington, D. C.:

Circular No. 58.—Irrigation in the Valley of Lost River, Idaho. By Albert Eugene Wright, agent and expert, irrigation investigations, office of experiment stations. Pp. 24.

Bulletin No. 73.—Irrigation in the Rocky Mountain States. By J. C. Ulrich. Pp. 64, pls. 10. Price 10 cents. Explains the agricultural conditions prevailing and the methods of acquiring and using water for irrigation practiced in that portion of the arid region covered more particularly by the states of Colorado, Wyoming, Utah, Idaho and Montana, in which the conditions and methods are somewhat similar.

His Obstinate Disposition.

Mrs. Kawler—I hope you are all well. Mrs. Naybur—O, yes, we're well enough now—particularly my husband. That's what provokes me. All the rest of us have had the grip, but he won't even take a slight cold.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Queen of the Seas.

Bobby DuBarry—I'd have you know that my ancestors came over on the Mayflower.

Tommy Tuff—Dat so? Why didn't dey come over on the Lucytaania?

One Independent View.

"For my part," said Mrs. Lapelling, with strong feeling, "I think a man that abuses his horse should be incarcerated at once. We ought to exercise the utmost obsequiousness to dumb brutes."—Chicago Tribune.

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

F. J. CENEY & CO., Toledo, O. Sold by Druggists. 75c. Take Hall's Family Pills for constipation.

Its Only Lack.

Nevada Man—I tell you, sir, nature has done a great deal for this State. Tourist (from the East)—Why, yes. All you need is to get a few people to come and live here.—Chicago Tribune.

Side Lights on Literature.

Walter Scott had just written "Kenilworth."

"I've a great mind to immortalize Winnetka next," he said. "Evanston and Wilmette, of course, are impossible." "Perhaps—who knows?—the great novelist had been hailed before magistrates in those two towns and fined for exceeding the speed limit.—Chicago Tribune.

Etiquette Not Involved.

Mrs. Hendricks (the landlady)—Can I help you to some more soup, Mr. Dumley?

Mr. Dumley—No, thanks. Mrs. Hendricks (engagingly)—Don't refuse, Mr. Dumley, because it isn't considered good form to be helped twice to soup. We're not particular people here.

Mr. Dumley—Oh, etiquette has nothing to do with it, madam. It's the soup.—Pearson's Weekly.

ETS St. Vitus' Dance and all Nervous Diseases permanently cured by Dr. Kline's Great Nerve Restorer. Send for FREE 24 trial bottle and treatise. Dr. R. H. Kline, Ltd., 921 Arch St., Phila., Pa.

Knew It Like a Book.

Night School Teacher—I don't suppose, of course, that any of you boys is familiar with Virgil.

Shaggy Haired Puppl—I ort to be ma'am. It's about six miles from Spoon river. I was born there.

An Unfortunate Interruption.

"George was just going to propose to me last night."

"And what happened?"

"A tire blew up, and then he couldn't think of anything else."—Cleveland Plain Dealer.

The Usual Way.

The doctor had told one of his best, but the professor did not crack a smile. "You and that story have met before, perchance," he said. "Yes," answered the professor; "per Chauncey M. Depew."

CASTORIA

For Infants and Children.
The Kind You Have Always Bought

Bears the Signature of *Chas. H. Fletcher*

With seventeen mills engaged exclusively in the business, Germany leads in the manufacture of tissue paper.

WHERE DID CHARLES SWEENEY GET HIS WEALTH?

WHAT BUILT SPOKANE?

WHY did the O. R. & N. build into Washington? The answer: MINES—MINES—LEAD MINES. WHAT MADE Senator Stanford and built his beautiful memorial? MINES. Why not such results since mining is the staple industry of the world? LEAD IS REGULAR AND CERTAIN, the market always calling for more and more, while the price does not fluctuate as with other of the baser metals. MILLIONS HAVE BEEN MADE FROM LEAD, and the best part of the story is the fact that the small investor has always had an equal chance with the man of large means. MANY A POOR FARMER, laboring man, mechanic and employe have come into vast riches by small investments in lead.

WE OFFER YOU THE SAME OPPORTUNITY

accepted by Sweeney, Spokane's millionaire, and the same opportunity accepted by other Spokane men who built the City of Spokane, by placing on the market the first block of treasury stock of THE AMERICAN LEAD MINES COMPANY—100,000 shares at FIVE CENTS PER SHARE. Our company is incorporated under the laws of the State of Washington; capital stock \$1,500,000; no debts; no incumbrance; property paid for; stock non-assessable.

OUR MINES ARE LOCATED

but fifty miles from the famous Cœur d'Alenes District. We are in the same mineral belt and lie between that district and Rossland, British Columbia—eight miles from Idaho and six miles from the British Columbia boundary. Our climate is equable, open and mild, work being done the year round. There is great activity on every hand at Metaline; large operators are turning in that direction and she bids fair to rival the camps in the Cœur d'Alenes. DON'T OVERLOOK the magnificent opportunity to BUY WHILE THE PRICE IS LOW. Full particulars upon application.

The L. Y. Keady Investment Co.

337-339 Chamber of Commerce

Portland, Oregon

PUTNAM FADELESS DYES

Color more goods brighter and faster colors than any other dye. One 10c package colors silk, wool and cotton equally well and is guaranteed to give perfect results. Ask dealer, or we will send post paid at 10c a package. Write for free booklet how to dye, bleach and mix colors. MONROE DRUG COMPANY, Quincy, Illinois.
