Raised Wages of Isthmian Laborers by Longevity Order While War Secretary.

The Panama Canal is one of the greatest achievements of any Republican administration.

As Secretary of War, Hon. William H. Taft personally assumed the responsibility of inaugurating the work and systematically shaping up the practical operations until a degree of efficiency has been reached that may well astonish the nations of the earth.

Mr. Taft has applied to this world project and history making enterprise those same qualities of careful, thoughtful investigation, penetrating judgment and absolutely fair dealing, which have made him so signally successful in the performance of all those duties of state which have brought him to the high eminence he now occupies as one of our greatest living Americans.

Must Know Personally.

Like the Philippine project and other great work laid upon him, he has studied the situation at Panama at close range and trusted to no second hand information with which to insure his success. There has been about ninety million dollars expended on the work to date and Mr. Taft has had to approve every dollar of this expenditure. He has not been satisfied with a single visit to the isthmus, but has made the long journey every year so that he might direct the work more economically. The result is that he has changed the situation there from an inhospitable region to a locality where Americans can live in healthful security without the fear of plagues or dread of contagious diseases. The rate of mortality on the isthmus is about the same as it is in our American cities.

Stages of the Work.

Work on the canal has passed through two stages, those of planning and preparation. It is now in the third and final stage, that of construction. Both of the earlier stages required the presence of a large working force, necessarily quartered in temporary and make shift accommodations. Because of these conditions, inevitable at the outset, early critics of the enterprise mistook the initial and temporary outfit for permanent equipment.

Throughtful About Labor.

Mr. Taft's chief concern has been the proper care of the laboring man on the isthmus. Under his patient and approved methods the terrible scourge of yellow fever, against which the French struggled in vain, the filthy and pestiferous state of the principal Panamanian towns, the rough labor camps, and other pioneer hardships of the two first eras, have been eliminated. He has accomplished these things through the activity of the Department of Sanitation, the Department of Municipal Engineering and the Building Department. To-day we find yellow fever driven from the isthmus, the deadly stegomyia mosquito thus rendered innocuous, malaria and pneumonia greatly reduced and a high average of health prevailing.

Mammoth Construction Project.

President Roosevelt appointed a special commission to examine the Isthmian situation last spring, and it reported Aug. 6, 1908. According to this special report there were at work at the Isthmus April 30, 1908, 26,118 men for the Isthmian Canal Commission and 7,075 at work for the Panama railroad, a total of 33,193 men all told. Housing this industrial army in quick time, with due attention to sanitation and hygiene, was a problem which would have been beyond most men. But Mr. Taft did it successfully.

To keep the machinery and tools in condition, three large machine and repair shops, two shipyards and numerous warehouses are maintained. When we recall that this enormous plant is operated at a distance of 1,382 miles from its nearest base of supply, New Orleans, and 1,975 miles from its main base of supply, New York, we can estimate with more justice and accuracy the magnitude and complications of the undertaking Mr. Taft has conducted so well.

Workingmen Appreciate Taft.

He has succeeded in impressing labor on the Isthmus with his kindly interest in its behalf. On this point the special commission's report says: "From the outset we were strongly impressed by the spirit of good will and loyalty of the employes * * * The general sentiment of the workers was expressed in the words of a mechanic, in one of the conferences which we held with representatives of different trades. Said he: 'We want it understood that we are American citizens and that we are proud to have a share in this great work. We believe the government is treating us right, and we are as much interested to see this thing a success as anyone.' This spirit of loyalty and interest in the work was evidenced on many occasions and should be accounted as an asset of the highest value to the government in the accomplishment of its colossal task."
