Helps Smaller Districts.

What the Hawley School Bill does: It helps the smaller districts, it provides ways so that each district shall have at least \$300. (In many cases, in this county, a portion of this will be taken out of the general fund of the county.) It provides that each district shall have at least six months school each School year. But it does not go into effect this year.

The \$300 will be raised as follows: The county court will levy a school tax sufficient to make \$7 for each child in the county between 4 and 20 years. On the first Monday of October, each district will receive \$100 out of the money so raised, and the remainder will be divided according to the number of pupils in the districts. If this does not give the \$300., then there must be a levy, of not more than 5 mills, on the property in the district. If, when this is added to first fails to make \$300, then the county court must take out of the general fund of the county, such amount as will equal the difference, and give to such district. If the valuation of the districts in the county is not raised and there are practically no more pupils in the districts, there are something like 22 districts that will receive money out of the general fund, the amounts ranging from \$1.00 to \$130. I hope to have added to some of the districts, some more territory, territory that, now, is in no school district. This will help the larger as well as the smaller ones.
