FIR & SPRUCE MILL TO START.

After Three Years of Idleness the big sawmill at Toledo will begin Sawing.

Last Tuesday evening Leslie Montgomery, of the firm of Mann & Montgomery, with headquarters at Portland, owners of the Fir & Spruce Lumber Company's mill at this place, arrived, accompanied by several men, engineer, clerks, etc., and the following morning began preparations for starting the big sawmill here. The mill being repaired and the machinery all

Mr. Montgomery says it is their intention to operate the mill during July. They will not attempt to run the mill at full capacity, but will be content to cut in the neighborhood of thirty thousand daily, rejecting twenty to thirty men in the mill. The logging camps will supply the hands required. The company has a million and a half board feet on hand and expects to do business and about that many feet every year, but they will be giving out news as soon as things can be put in working order.

As Important Meeting.

A meeting of the citizens of Lincoln county has been called to meet at City Hall here this evening. This is an important meeting and should be attended by every citizen. The object of the meeting is to take some action looking to the drainage of the river from Elk City to deep water on the lower river.

This is a matter of vast importance to the entire country and all Lincoln county. It is a little known fact that the river is being improved so that it may be enabled to get up to Toledo and Elk City and that there is a large number of mills and other products of the country. Unless this be done we cannot progress; our commerce will continue to be stunted.

Our representation in Congress writes that he is exerting his utmost influence to have a bill appropriating money for this work passed, but does not seem greatly en-

The fact of the matter is we have a party that is bent on turning our waterway into Oregon, outside of the Columbia, is upon us. The attitude of the Government, through its engineers, is dead against us, and unless we all join and help, we can be expected from the government with in time to do us good. We have about as much land as we can use and the more we can the better it is. This is the first time of the year that we can do any good work. It is time that we started it.

We want to use all our little means to improve this stream and we will if we can get a bill passed through Congress for the same purpose.

This is the proper time to improve that stream and that is what we are after.

We can follow in the footsteps of Cow Bay, Winnemucca, and other places where we can get our little means to improve the stream and, action in that direction should be taken at once.

Our friends and other interests are handshaking; our work, whatever it may be, is not dependent upon anything that they ship in or out, because our river has too or three small bars in it. Fifty thousand dollars is more than enough to simple to drain the river from Elk City to Yaqunia deep enough to allow vessels to run between Linn County merchandise and to carry out curves of lumber and farm products and the saving in freight in five years alone would pay the bonds, and the price of timber will increase in business that it would amount to millions. The thing to do is to help ourselves. We have the commerce, let us be independent and make use of the water that a beneficent Providence has sent flowing past our door, and be no longer vessel to any corporation, nor stand longer strangling for what a misguided government should freely grant us.

Our meeting tonight is intended to help along a movement to place Lincoln County's interests upon the commercial map of the world.

J. D. RUMSEY

Just arrived my large assortment of up to date shoes of all kinds. Call and see

E. P. FISHER

The particular man demands particular attention! You can get them at Depot Barber Shop, Toledo, Ore., near best land. For Sale.

Several good milk cows for sale. Enquire at this office.
