C. G. NORTH, Proprietor.

The Port of Toledo.

The Daily Capital Journal of Salem last Thursday said:

"Meeting with opposition in the formation of the larger Port of Yaquina, the people of Toledo have gone ahead and formed a local port to improve the channel of the Yaquina river.

"The opening of new sawmills, the manufacture of lumber for export, and the need of getting timber out to market from that point by water makes a local port necessary.

"The people of Toledo are to be congratulated on getting into the habit of doing things to help themselves, and not waiting for the co-operation of less progressive communities.

"The committee of citizens finds that the obstacles to be overcome are not so great as has been expected, and the bars can be deepened with a little dredging so as to let commerce in and out.

"This is the spirit that wins for any town, and those who are ready to quit at any obstacle that appears never get very far.

"Toledo has a great future as a manufacturing city and the timber of Siletz will largely go to market by that gateway."
