The money and the other with proper
receipts. The short end of the thread is to be
placed on the pole and the other end is to be
placed on a fork handle through a rope of such
length that when the end which is placed on the
pole is to be made to reach up to your armpit.

**Small Form**

![Small Form Diagram]

**The simplest arrangement for
placing and working a<br>tree line**

A small pole or post should be placed only a few feet from the
end of the line and the rope should be
placed around it and the other end of the
rope should be placed in a fork handle or
rope handle and then the rope should be
straightened and tied to the pole.

**Diagram:**

The money and the other with proper
receipts. The short end of the thread is to be
placed on the pole and the other end is to be
placed on a fork handle through a rope of such
length that when the end which is placed on the
pole is to be made to reach up to your armpit.

**Plan of Work:**

1. Select a breezy spot.
2. Drive a post or stake into the ground.
3. Tie one end of the rope to the stake.
4. Wind the rope around the stake several times.
5. Pull the rope taut until it is tight against the stake.
6. Tie the other end of the rope to a tree or stake.
7. Adjust the slack in the rope to ensure it is tight.
