The Fourth will probably be a sane one in Toledo this year. Some of our people will go to Newport, others will go to Waldport, and some will form picnic parties and go to the woods.

Contractor John Ebby has been putting rock on the road this week, beginning at William Brown's place and working back toward town. The rock is now spread as far as the east side of George Pether's place.

John A. C. Nye, James W. Chaffin and Joseph T. Mustoe of Waldport were in Toledo Tuesday making proof on their claims before County Clerk Ira Wade. These gentlemen reside in the forest reserve.

The steamer Truant will run excursions to Newport on the Fourth as follows: Will leave Toledo for Newport at 7 a. m., 12:30 p. m., and 7:30 p. m. Leave Newport for Toledo, 10:00 a. m., and 6 p. m., and immediately after the dance at night. Fare round trip, 75 cents. The steamer will also run her regular excursion to Newport next Sunday, leaving Toledo at 9 in the morning. Fare, 50c.

A Startling Announcement.

One of the most conclusive proofs as to advantage of the dairying industry that we have seen is in a recent article by Jas. E. Downing, of the United States Department of Agriculture. It is contained in the following paragraph:

"It has been ascertained that approximately \$8.35 worth of fertility is removed from the soil with the sale of every ton of wheat, while with every ton of corn that is sold, approximately \$6.50 worth of fertility is lost to the soil; but in the case of dairying, where butter is made and where all of the by products are fed to the pigs and calves, it is found that only 36 cents worth of fertility is removed with each ton of butter sold. The commercial value of each ton of wheat at 75 cts. a bushel is approximately \$24.75. The commercial value of a ton of butter at 25 cents a pound is \$500. For each \$100 worth of wheat that is sold from the soil \$34.50 worth of fertility is taken off the farm, but for every \$100 worth of butter that is sold only 7 cents worth of fertility is removed from the soil."
