Census Shows Increased Farm Values

WASHINGTON - The value of farm property in the United States, including land and buildings, has practically doubled in the last 10 years, according to figures released by the Census Bureau. The total value of farm property at present is $61,926,000,000. This is more than four times the value of $15,000,000,000 reported in the 1920 census.

More than two-thirds of the farmers in the United States have increased their holdings since 1920, while more than half of those farmers have increased their holdings since 1930. There have been some slight decreases in the number of farm families, with a decrease of about one-tenth from 21 million in 1920 to 19 million in 1930. The decrease in the number of farms has increased from three to five per cent in the last decade.

How Dr. Graham Bell Keeps Away Heat

During the hot summer, coolness is the main desire of people. In New York City, Dr. Alexander Graham Bell, who invented the telephone, keeps cool by using a simple apparatus. He has a telephone in his study and uses it to call the coolness into his room. He puts the phone in the window of his room and the coolness enters the room through the telephone wire. This is done by connecting the telephone wire with a wire that is connected to a cold storage plant. The coolness is then transferred to the room through the telephone wire.

Cucumber Cures Are Good

Reliable, Unfailing, and Not at All Difficult

To make cucumber cures one needs only two ingredients: cucumbers and salt. To prepare the cures, the cucumbers are sliced and salted, and then left to drain for a few days. The salt solution is then used as a cure. It is recommended to use cucumbers that are not too large and not too small.

Wireless Telegraph for the Cavalry

Mrs. Straight tells the public that the value of the cavalry has been increased by the adoption of wireless telegraphy. She says that the cavalry can now communicate with the cavalry on the other side of the country, without the need for wires. She says that the cavalry can now communicate with the cavalry on the other side of the country, without the need for wires. She says that the cavalry can now communicate with the cavalry on the other side of the country, without the need for wires.

Interiour Department Issues Warning

Changes have been made in regulations for the disposal of sewage. The new regulations require that sewage be disposed of in a manner that will not cause pollution of the water supply. The regulations also require that sewage be disposed of in a manner that will not cause pollution of the water supply. The regulations also require that sewage be disposed of in a manner that will not cause pollution of the water supply.

Satisfactory Method of Disposing of Farm Sewage

Ordinary Cesspool and Best and Cheapest Plan—Anyone Who Can Pile One Stones on Top of Another Can Construct a Septic Tank Which Should Be, Large Enough to Hold Two Months' Wastes Within.

Well Arranged Cesspools for Sewage—Cross Section

The secret of success lies in the way the sewage goes in and out. To make this work, it is necessary to have a level when the water is going in and out. The water should be allowed to go in and out in such a way that the sewage is not allowed to go in and out too fast. To make this work, it is necessary to have a level when the water is going in and out. The water should be allowed to go in and out in such a way that the sewage is not allowed to go in and out too fast.
