Waldport

The Waldport Grange held its first meeting in their new hall Wednesday evening. This building is 40x70 feet. The hall is on the second floor and the lower floor will be fitted up for a store when needed. The hall is provided with a splendid dance floor and has ample exits, thus overcoming any argument as to it's being a fire trap. Its acoustic properties are superb.

Newport

The tug Roscoe came in the first of the week, having in tow the sailing schooner Coquille. The schooner is now loaded at Yaquina with hay, feed and supplies for the Porter Brothers, railroad contractors, at Mapleton. The longshoremen at Yaquina struck for higher wages. Superintendent Chas. Creighton, who had charge of the work, was paying his men 35 cents per hour, but they were not satisfied with this and wanted 50 cents per hour, but the superintendent could not afford to pay this amount so the men struck, fifteen of them, and the work stopped. Mr. Creighton then sent to Newport for help and eight young men responded. These men worked for the 35 cents and thought they did very well as it was not very hard work. The Yaquina boys called the Newport boys have-seeds, scabs and every kind of mean things but they worked right along and paid no attention and got their money and came home feeling fine.

The Mirene went down to Waldport and brought back a cargo of shingles and cased salmon. The shingles, seventy thousand, are for the Prosser lumber yard at Nye Creek.

The Ahwaneda returned to Portland for another cargo of merchandise for Newport and Toledo. She made the run from Yaquina to the Columbia bar in eight hours. The sea was calm and the wind favorable. This is going at the rate of twelve miles per hour and is fast time for these small vessels.

Newport is preparing to have a prosperous season. Some fifty buildings are now under way of construction, most of them being cottages costing all the way from \$800 to \$2,000 each. W. D. Wheeler is putting a hotel, four stories high with basement, with forty

rooms and will cost about \$15,000. The appointments in the hotel will all be modern. Mr. Roper is building a studio and rooming house to cost about \$5,000. L. H. Payne is building a very pretty bungalow at a cost of about \$15,000. Mr. Lewis Harding is putting up a concrete dwelling that will cost \$2,000, the first of the kind built in Newport. Mr. Mardien has commenced the construction of the cold storage plant on Front street. The foundation is already laid. This is a most important improvement for Newport. The fishing business is good, especially the deep sea fishing, therefore the cold storage is a real necessity.

Grange Co-Operative Creamery

At a meeting held in this city last Saturday committees were appointed to look into the necessary details pertaining to the establishing of a co-operative creamery association here. The movement is going forward under the supervision of the local Grange, and we predict that they will see it through to a successful completion.

Toledo has long felt the want of a creamery and the business men of our city will undoubtedly do what is right by the association. The location of such an institution here will also help the farmer as well as the merchant, as statistics show that co-operative creameries, where successfully managed, pay a higher price for butter fat than do creameries owned by individuals or corporations.

The committees appointed were: For securing equipment—E. B. Shumway, John Pennick and M. J. Thompson.

Constitution and By-laws—I. F. Hiser, Floyd Butler, Claus Christiansen, Donald Stewart and J. W. Parrish.

Another meeting will be held in the near future and more definite arrangements made.

The buildings will be located on the lots just east of Chauncey Hawkins' residence. The contract for grading these lots, preparatory to building, has been let to Carl Heath and he is now at work on the same. The main building will be 30x48 and two stories in height. A ten foot porch will extend on three sides of the building, which will contain eleven rooms and two baths. The operating room will be glass on three sides, giving good light. A steam heating plant will furnish heat for the rooms. The lower floor will be of marble, making it easier to keep sanitary and clean. The building will accommodate six or eight patients and will also be occupied by the Doctor as a residence.

Avery received a letter this week from our former townsman, George Walker, in which Mr. Walker asks Mr. Avery to see if he can again secure the ship yard back of the Leader office and lumber for the building of a ship. As soon as Mr. Avery secures the necessary data he will wire Mr. Walker at San Pedro, California.
