Considerable excitement was caused by the discovery of some bear tracks down in Keady's field. The school has ten teachers and two hundred and twenty pupils. The high school has thirty pupils. A number of families have moved to Newport for the purpose of schooling their children. A good public school is a great advertisement and is worth all its costs. Education is the thing that civilizes and enlightens the world.

The club is undoubtedly starting out right and is doing a good thing for the country—getting the farmers organized and in a position to get the best prices for their products as well as finding a market for them. The club has been given the name of being a bunch of hot air peddlers but it appears that the knockers are some back woods fellows who do not believe in prosperity which we find all over the country. The club has been arguing on the berry question for some time and are now talking of putting in about twenty acres. This is sure a good thing, for Lincoln county can raise as good berries as the Willamette Valley and they make good money at this and why not do as well here for we have the same market.
