## Gets Right Twist On Rheumatism

### Makes Short Work of Cleaning Out Your Entire System—Aches and Pains Go Fast.

In S. S. S. You Get a Twist on Rheumatism That Settles It.

Many a rheumatic sufferer has been to the drug store for a bottle of S. S. S. and been handed something claimed to be "just as good." Truly, to ask for bread and be given a stone is still in practice. If you are troubled with rheumatism in any form be sure to use S. S. S. and note its wonderful influence. S. S. S. has the peculiar action of soaking through the intestines directly into the blood. In five minutes its influence is at work in every artery, vein and tiny capillary. Every membrane, every organ of the body, every cranny becomes in effect a filter to strain the blood of impurities. The stimulating properties of S. S. S. compel the skin, liver, bowels, kidneys, bladder to all work to the one end of casting out every irritating, every pain-inflicting atom of poison; it dislodges by irrigation all accumulations in the joints, causes acid accretions to dissolve, renders

### TAKES OFF DANDRUFF, HAIR STOPS FALLING

Save your Hair! Get a 25-cent bottle of Danderine right now—Also stops itching scalp.

Thin, brittle, colorless and scraggy hair is mute evidence of a neglected scalp; of dandruff—that awful scurf. There is nothing so destructive to the hair as dandruff. It robs the hair of its lustre, its strength and its very life; eventually producing a feverishness and itching of the scalp, which if not remedied causes the hair roots to shrink, loosen and die—then the hair falls out fast. A little Danderine tonight—now—any time—will surely save your hair. Get a 25-cent bottle of Knowlton's Danderine from any drug store. You surely can have beautiful hair and lots of it if you will just try a little Danderine. Save your hair! Try it!

**A Fool Stunt.** Since the incident of the "Wolf of Wall Street," special attention is called by some of the press to the fact that it is against the law to impersonate a congressman. We fail to see why any good citizen should want to be guilty of a fool stunt like that.—Beaumont (Tex.) Journal.

## GOOD WINTER LAYERS

### Many Things Needed for Winter Egg Production.

**Poultrymen Must Look Carefully Into Proper Housing and Care of Birds to Secure Greatest Returns From Their Flocks.**

The winter season is rapidly approaching and poultry raisers in order to have a successful season and get the greatest returns from their flocks must look carefully into the proper housing and care of the birds during the cold, blustery days which will soon be here.

The time is also rapidly approaching when diseases peculiar to the feathered beauties, and large money yielders, will develop. Should you not be in a position to exterminate the maladies quickly, all your expected profits will be turned into losses and the season made a failure. Should this be the case you will at once set up the cry "there is no money in chickens."

This is up to you. If you sit idly by during these bright, beautiful days and give no heed to the future comfort of your fowls, do not complain when you do not get eggs when they are a luxury or set up a wall when your birds are picked off by the ravages of disease. Roup time will soon be here and this is indeed a most dangerous disease among chickens. See that your houses are protected against all drafts and that the dampness is entirely excluded. Do not be afraid to give the birds plenty of good fresh air, but do not permit drafts. The open style of poultry-house has been widely adopted and it is a good one, but unless constructed in the proper manner is sure to result in the death of many birds.

The market for fresh eggs is rapidly reaching a high-water mark and this household necessity will, if predictions count for anything, bring even a higher price than that of last winter. Be

Good Winter Layer.

prepared to have eggs when they are wanted. In order to accomplish this several things are necessary. First, keep the hens healthy and vigorous, feed them properly and keep them busy. Idle hens never pay for their board and keep.

Study the peculiarities and preferences of the fowls and endeavor to give them just what they want. Remember you cannot get eggs by failing to attend to the many details connected with the poultry yard and general inattention to business. A few hours each day, morning and night, will accomplish wonderful results. See to it that your part in the program of egg production is carried out and the hens will do the rest.

**Heavy Producing Oats.** In some Ontario experiments the varieties of oats producing an average yield of more than 90 bushels an acre, based on the results of five years, are Banner, New Zealand, Yellow Russian and Peerless. Scarborough produced the largest yield of straw, being 3.27 tons an acre.

**Hogs and Sheep.** If the farmer is looking for quick returns in live stock and for a large percentage on the money invested, there are no animals on the farm that will beat the sow and the ewe.

**Honest Packing.** The man who puts up an honest pack of first-class fruit in uniform, well-made packages need never fear that the money spent for attractive labels will be wasted.

**Trees Set in Fall.** Trees set out in the fall do better when the winter is moderate, as the ground is drier and the trees make a greater growth the next season.

**Water for Horses.** Don't allow your horses to drink a large amount of water on coming into the stable very warm. Allow them to cool.

**Hold the Dairy Heifers.** Hold right onto the best of your dairy heifer calves, and sell some enterprising neighbor your surplus males that are of superior quality.

**Finnigan's Rival.** A few years ago Engineer Donahue of the Missouri Pacific had a breakdown to his engine on the Kickapoo grade. He went to the telegraph office and sent the master mechanic, W. T. Hume, the following message, in which, to our notion, the famous "off again, on again" message of Finnigan is clearly outclassed:

"Mr. New: Number 2 Has busted her flue While going through Kickapoo. What would you Have me do? —Donahue." —Potter Kansan.

## Keeping the Body in Repair

*Nature intended that the body should do its own repairing—and it would do so were it not for the fact that most of us live other than a natural life.*

Nature didn't intend that we should wear corsets, tight collars or shoes, nor live in badly ventilated and draughty houses, nor eat and drink some of the things that we do, nor ride in street cars when we should walk.

The consequence is that the body when it gets out of order must look for outside help to make the necessary repairs.
