For once the Leader agrees, or partially agrees, with the Sentinel. In that paper's issue of the 12th it hops onto the Sheriff for wanting a deputy, and in last week's issue it does likewise to the County Attorney, for having his salary increased. The Leader did not fight the passage of these bills for the reason it believed the same was a matter to be decided by the taxpayers, as they are the ones who have to pay these bills, and the increase may have been just. The Legislature increased the duties of the Sheriff by making him tax collector and he may be entitled to a deputy, but, as the Sentinel states "the duties of the County Attorney have not been increased, and they can see no reason why his salary should be raised," we will have to agree, as who is in a better position to know than Mr. Stewart. Now, if the Sentinel is really sincere in this matter, the Leader will join in to invoke the referendum and let the people decide as to whether the salaries should be increased, or perhaps the recall could be used to better advantage. We stated several months ago that we were not in favor of recalling the County Attorney, as it would put too big an expense on the taxpayers to hold a special election. But it now seems certain that there will be a special election this Fall so the matter could be thrashed out without any additional expense to the taxpayers.

**OUR OREGON STATE INSTITUTION**

The School for the Deaf. About two miles north of Salem, situated on the Oregon Electric railway, is a school for the purpose of teaching the deaf children of the State.

There is a farm with this school and twenty-five Holstein cows and a number of chickens. Here most of the products for the school is raised. They cannot use all of the food so much of it is sent to other institutions of the State. The buildings are made of brick and are modern in every respect.

The children could not hear a bell or hear the teacher call, so she waves her handkerchief. This is seen by the children, who have very bright eyes.

The children are given their first lesson by sounds. The teacher places letters, such as H, K, P, T, on the board and calls upon a certain child to sound them. If it is hard for them to distinguish the movements of their teacher's teeth and tongue they will place their hand over the mouth to feel her breath or place it on her throat to feel the vibrations of the vocal cords. The children will hold a mirror before their mouths to see the movement of the tongue.

The children range from six to twenty-one years of age. A child may not enter into this school until six years old. If the parents of a child discover it is deaf they should write to the deaf school and valuable information will be given them for the care of the child until it is old enough to enter the school. Deaf children, at home, are often mistreated.

A visitor at this school was once asked to examine a class. The teacher gave him a piece of paper with the pictures of a doll, dog, etc. On another sheet was the names of these things. The visitor asked a little girl to show him a picture of a doll. This she did. Then he asked her to show him the name of a doll. She did this also. The children are taught to read very much when they are in the higher grades, and also write compositions. A little girl was asked for her note book once. Though she was totally deaf, she understood him. When he got through with it he said "Thank you." She said "You are welcome."

The children are wakened in the morning by turning on the lights at six o'clock. At six-forty they have breakfast; after breakfast the girls wash dishes and make beds and sweep the floors. The boys are learning the printing trade, girls are learning to cook while some small boys are also learning to cook. The school calls at eight o'clock and lasts till noon. Then afternoon they have short sessions of school. Visitors are welcome at the school at any time.

The above was written by Marie Miller after hearing the selection read from the Oregon Teachers Journal by the teacher.
