LET'S BE UP AND DOING

The following letter, written by one of the large timber owners of this county, makes good suggestions that would be well for the people of this county to follow. Let's act on these suggestions without delay:

"Everett, Wash., Aug. 3, 1915

"Mr. J. B. Miller,
Toledo, Oregon.

"Dear Sir:—As you know, we own a large tract of timber tributary to Yaquina Bay and for several years we have been trying to figure out some way whereby we could commence operations there, but we have been unable to find a solution where we could manufacture this timber and come out whole, to say, nothing of making a profit.

In shipping lumber from there by rail, the territory which can be reached is very restricted and you come in competition with all of the mills through Oregon and Washington, so that a price can not be obtained that will allow manufacturing down there. The same holds true with the water shipments, as only small boats can get in there so shipments must be made to California only and everyone knows that California is the dumping ground for all of the tide water mills from Coos Bay to Vancouver. So, it seems to us that that country can never be developed until we have a deep water harbor so that boats carrying upwards of a million and half feet can make that port.

I believe that if we go at it in the right way we can get Congress to make a small appropriation to prepare estimates and plans for improving the harbor with the further idea that we will form a port district, taking in a large amount of timber tributary and that the Port District will pay a reasonable proportion of the cost of making the improvements the Government to pay the balance.

In order to do this it seems to me the proper method would be to have the commercial bodies of Newport, Toledo, Albany and of the other towns on the eastern end of the Corvallis & Eastern road all work together and petition their Congressman and Senator to ask for this appropriation at the next session of Congress.

Unless they will all work in harmony it would be useless to start anything, but if they will all see the benefits to accrue to them and are willing to get in and drill, I believe this can be accomplished and if you will take it up with these bodies and get the thing started, I will be glad to come down there at any time and assist in getting it in shape to present to their representatives.

I believe the present plan should be for deepening the bar and perhaps the harbor up as far as Yaquina so as to connect with the railroad, but I do not believe it would be policy to include any river improvements. As you know, the River and Harbors Committee has turned down nearly all bills calling for small river improvements. If we can get enough to cut out the bar so that vessels can get inside, we can then take up the other improvements and probably get whatever is necessary, so I think it is very important to have Toledo not insist on having river improvement at the same time.

One thing that will be necessary in order to accomplish our purpose will be to have all the data obtainable in regard to natural resources tributary to this harbor. This should take in all the territory all the way up the C. & E. road. The local commercial bodies can probably get a lot of this information, but in order to have it used at Washington, it will have to be compiled by some competent man who will be able to put it in the proper shape and also show his authority for the figures, so that whoever introduces this measure and speaks on it will have information that he knows is correct and that no one can dispute. It would probably be necessary to hire some expert for a short time to get this

material in proper shape.

I have talked with some of the Congressmen and Senators of other states and if we have the thing in the right shape, can get some support for putting this through, so wish you would take it up at once and get them to work it out, as we want it all in good shape before Congress meets so that we can take it up with the other representatives and have it fresh in their minds. You know the Government works slowly and if we do not get the appropriation this term it will put us back just that much farther.

I do not know how much of an appropriation it would take to make these estimates, but suppose some of the engineers could give us an idea on this point. It might be a good plan for you to call on Captain Paulhamus, the Government engineer in Portland, and see whether he would feel like giving any information along these lines.

Yours truly,
Signed, F. R. Pendleton.

Fred Rattey was a Waldport visitor Saturday and Sunday.

Carl Davis, the Siletz merchant, returned Monday from a visit at Portland.

Mrs. K. C. Egbert of Sorrento, Idaho, arrived last week for a visit with her sister, Mrs. Walter Hall at Siletz.

Miss Lillie Miller of Pioneer and Miss Helen Meredith of Portland were in the city Monday and Tuesday visiting friends.

Mrs. G. A. Landis of Gold Hill passed through on the train last Saturday to Newport to visit her mother, Mrs. C. C. Kubler.

W. E. Williams who has been assisting in the construction of the new Standard Oil Depot at Yaquina, returned home Saturday. He says the plant is practically completed.

Mrs. Emma Henshaw of Dallas passed through Toledo Tuesday, being enroute home from a visit with her husband at Siletz. Mr. Henshaw has the contract for building the new schoolhouse at Siletz.
