CITY COUNCIL PASSES RESOLUTION

At the meeting of the City Council last Monday evening the following resolution was passed, and the recorder forwarded a copy of same to the Rivers and Harbors Engineers at Washington, D. C.:

Whereas The River and Harbor Act approved March 4th, 1915, contained provision for a preliminary examination of Yaquina bar, bay and harbor, Oregon, and thereafter an examination and a favorable report thereon recommending the survey were made; and that said report was referred to the Board of Engineers for Rivers and Harbors for consideration and recommendation, who, acting on said matter, refused to recommend the survey on the grounds of (1) inadequate returns from money formerly spent on this project, and (2) that the prospective commerce resulting from said improvement would not justify the expenditure.

And Whereas, The Board of Engineers for Rivers and Harbors has invited all parties interested to submit statements and arguments bearing upon the necessity of said improvement in the interests of commerce and navigation.

Now Therefore Be It Resolved That the City of Toledo, Lincoln County, Oregon, acting through its Mayor and Common Council, submits the following statement of facts:

That the City of Toledo is an interested party by reason of its location being situated on Yaquina Bay ten miles from its mouth at the present head of navigation for ocean going vessels.

That as to the first reason assigned by the Board in refusing the survey of Yaquina Bar, Bay and Harbor, namely: that of inadequate return from the money formerly expended, please consider that the money heretofore expended was practically all of a preparatory nature for work which was to follow. Had the Columbia River or any other of the great projects been abandoned after having got but a foundation started for the work to follow surely none of them could have been declared a success, the good results from the work done are evidence in the fact that the depth of water on the Bar was increased seven feet, thereby making it possible for coasting vessels, carrying 700,000 feet of lumber, to pass safely out over the Bar as they now are doing.

As to the second reason given for not allowing the survey, namely: that the prospective commerce resulting from the improvement will not justify the expenditure, we desire to call your attention to the fact that there is, adjacent to Yaquina Bay and seeking a port of exit, over fifteen billion feet, board measure, of merchantable saw timber; that this timber is in the hands of individuals and corporations who are ready to manufacture the same into lumber as soon as a means of transportation to the markets of the world can be secured; that there is no means of transporting this timber and the lumber manufactured therefrom other than by long rail shipments over a line with which there is no competition or by small coasting schooners carrying 600,000 or 700,000 feet to San Francisco; that it is an undisputable fact that adjacent to the Yaquina Bay is one of the largest bodies of standing timber in the world; further, that the lumber capable of being manufactured from this timber is wanted in the markets of the world and that by the expenditure of a moderate amount of money in improving the Bar and Harbor of Yaquina Bay the largest carrying ships of the world could load at our mills and would carry our lumber westward across the Pacific or eastward through the Panama Canal to the places of demand.

Lumber is not the only commodity which would figure in the increase of commerce resulting from a further improvement of this project. If the Yaquina Bar and Harbor were sufficiently improved to allow the entrance of the great freighters of the sea produce of the fertile Willamette Valley and a great portion of Eastern Oregon, consisting of wheat and other grains, hops, dried and green fruits, meat and other produce, would be nearer to the markets of the world from 200 to 600 miles of railroad transportation.

And Be It Further Resolved, That a copy of this resolution be forthwith forwarded to the Board of Engineers for Rivers and Harbors, Southern Building, Washington, D. C.

SKOOKUM

Skookum has voted for preparedness. It was the two old parties against the Socialists. So Skookum will prepare. The only question is, How shall we prepare? We shall urge our congressmen and senators to have a fort built at the mouth of Skookum creek. We demand Skookum fort shall have million meter guns, shooting at least ten miles farther than any Jap or German gun, and not shooting hot air only. We demand the latest sort of periscope, able to look up an enemy's ship before it is too late to save us. We demand shells be made here. We have a shell factory at Oysterville but we want another at Skookum. We want mines that are bigger than the Toledo coal mine. We want powder mills—Selditz. We are not demanding the government shall do all. We are now digging trenches on either side of the Skookum roads. The present war has shown the value of barbed wire fences. Send a thousand tons to Skookum and we will put it up where it will do the most good. The Skookum pupils turned the late snow into hand grenades that shattered windows and Sourdough Smith's temper almost like the real things. I believe in real preparedness. Germany has shown us the way. It is clear to me why she is the winner so far. First, her people are better educated and better cared for. She has adopted more Socialist principles. She owns the railroads while the railroads own us. And so with other industries. Everyone knows or should know that a vote for preparedness now is a vote to put more millions into the pockets of Morgan, Rockefeller, et al for faulty roads at double prices. And these same dealers who yell "patriotism" now would sell to our enemies if there should be a real prospect of war. Their country is the one whose streets are paved with real gold. We have just one big gun to drive away invaders. You voted for it and you will vote for another worse one Nov. 7. It is your 1916 tax roll. Skookum isn't prepared for that. Some Skookum people have what I call a poor streak of patriotism. It begins at home like their charity. Their John is better than the neighbor's Jack. Skookum is a little better than Newport or Toledo. Lincoln county must not be put below Benton. And so on to the United States of the munition makers. Such patriotism demanded an old drunken robber like Huerta should salute our flag or we would shoot some 400 innocent other Mexicans, which we did. It looks to me like the same sort that is howling at Austria and Germany now because a lot of fools persist in traveling in enemy ships, when Europe is filled with insane people. Our iron mills have killed and crippled ten times as many Americans this last year as the German or Austrian submarines have hurt, and do we even write them notes of protest? We call them patriots.

I was asked the other day what pan-American meant. It means we want to teach Central and South America to cook their beans in U. S. frying pans. "Made in Germany" is out of date—maybe.

The lid is tight shut in Skookum, but our boots leak a little. How is it in Toledo and Newport?

WAR UPON PAIN! Pain is a visitor to every home and usually is comes quite unexpectedly. But you are prepared for every emergency if you keep a small bottle of Sloan's Liniment handy. It is the greatest pain killer ever discovered. Simply laid on the skin—no rubbing required—it drives the pain away. It is really wonderful. Mervin H. Soister, Berkeley, Cal., writes: "Last Saturday, after tramping around the Panama Exposition with wet feet, I came home with my neck so stiff that I couldn't turn. I applied Sloan's Liniment freely and went to bed. To my surprise, next morning the stiffness had almost disappeared, four hours after the second application I was as good as new." March, 1915.
