

REMINGTON-UMC

BIG GAME RIFLES

FOR dropping a bighorn across a canon, or stopping a charging grizzly—range, precision and penetration combined with quick, positive action are the qualities that have made these rifles famous.

Remington-UMC High Power Autoloading Rifle—Five shots, (simply press trigger for each shot), solid breech; hammerless; positive safety device; take-down simple and easy without tools.

Remington-UMC High Power Rifle, Action Repeater—the only big game rifle of its type—Six shots; solid breech; hammerless; magazine ensuring compactness, balance and absolute safety.

Big game hunters place more responsibility upon their arms than any other sportsmen in the world. The prestige of these two Remington-UMC High Power Rifles with this group of critical sportsmen is significant—and each year shows a steady increase in the number of men who shoot these modern rifles.

The International motor truck keeps your customers satisfied.

There is a limit to the amount of work horses can do. That limit changes with the seasons, with the weather, and with the condition of the streets and roads. Horse deliveries and horse hauling mean disappointed customers at times, or customers satisfied at ruinous expense.

An International Motor Truck Has No Such Limit

Its service is not affected by seasons or weather and very little by street and road conditions. You can make a schedule and keep it throughout the year when you use an International motor truck. What is that worth to you? Write us and we will tell you.

MITTY WRITES AGAIN

Salem, Oregon,

Aug. 8, 1916.

Editor Lincoln County Leader,
Toledo, Oregon,

Gentlemen:
Enclosed you will find money-order, in payment for subscription of your paper. Would like my subscription to begin with the issue in which my letter to Mr. Ball was published. I also wish to thank you for publishing the same.

While I do not know your sentiments upon the cruise question, I think an open, frank discussion of such questions, awakens thought and creates discussions that results in developing clearer, broader conceptions of such problems; and it matters little, which side of a question a writer or speaker takes, so he causes serious thinking and discussions that leads toward the right solution of the problems to be solved.

Sincerely yours,

Geo. C. Mitty.
