"COWS AND CORN MAKE THE COIN"

That is the slogan adopted in Coos County since J. L. Smith, County Agricultural Agent, came on the job three years ago. Furthermore, the result already apparent is expressed as follows: More Corn, More Silos, More Silos, More Cows, More Cows, More Cash.

In all of the corn growing contests last year the average yield of silage corn was 32 tons per acre. The highest yield was 60 tons per acre. The crop this year is good although not as large as last year.

Coos County dairymen are growing more corn and building more silos each year. There are now nearly 250 silos in the county, most of them having been built since Mr. Smith started work.

In addition to the silage and silo work Mr. Smith has given a large amount of time to cow testing associations with the result that four or five are maintained yearly with a total of about 3,000 cows on test.

The following table gives a yearly summary of the records of all the cows in all the testing associations in the county:

The Average production per cow per year, 240.5 lbs. butter fat. The average cost of feed per cow per year, \$32.33. The average profit per cow per year, \$50.80. (Value of calf, skim milk and manure not included.) The average cost of producing a pound of butter fat, \$0.13.
