HEAD OF NON-SOUTH NORMAL SCHOOL OF A SCHOOL CANNOT SUPPLY DURING FOR TEACHERS.

Memphis, Ore.—A careful analysis of the situation will convince any one that Oregon needs a Normal School in Eastern Oregon and also one in Southern Oregon. It is a well-established fact that a centrally located Normal School cannot supply the needs of the entire state. The need of a Normal School in Eastern Oregon is readily proved by the most cursory investigation of the list of our students and the list of our graduate teachers. The estimated population of our state in 1914 was 795,587. Take for example the eight Western Oregon counties, Clatsop, Clackamas, Benton, Lane, Linn, Marion, Polk and Yamhill Counties. Their population for 1914 was 214,608, or less than 27 per cent of the total population of the state, yet 50 per cent of the graduates from our Normal School for the past five years are teaching school in some one of these eight Western Oregon counties. There are 35 counties in the state, yet eight of these counties are getting half of the benefit of the teachers for which all of the counties pay the taxes.

Here is the list. During the past five years we have supplied the following graduates as teachers to these counties:

Clatsop, 18; Clackamas, 20; Benton, 25; Lane, 26; Linn, 28; Marion, 28; Polk, 25; and Yamhill, 20. In other words, 203 of our 407 teachers who have secured places in the public schools in Oregon during the past five years, have gone to these eight Willamette Valley counties.

Now take eight typical Eastern Oregon counties and see if they have secured their proper share of teachers with Normal training. During the past five years we have supplied Normal graduates as follows to these Eastern Oregon counties:
Baker, 9; Grant, 1; Harney, 4; Malheur, 2; Morrow, 4; Umatilla, 10; Wallowa, 7; and Wheeler, 2.
The eight Willamette Valley counties had 203 Normal teachers as against 39 Normal teachers for the eight Eastern Oregon counties. Eastern Oregon received less than 10 per cent as against Western Oregon's fifty per cent.
