ONE NORMAL NOT ENOUGH

Oregon has but one Normal School. This school is located at Monmouth. Excellent as is the work of this school it is utterly unable to supply but a small part of the need for trained teachers for the State.

Of more than 6,000 school teachers in the public schools of Oregon, but 15 per cent have been trained for their profession of teaching in Normal Schools.

It is a well established fact that our one Normal School cannot supply the needs of the entire state. That is why we ask for your work and vote for the proposed Eastern Oregon State Normal School at Pendleton, Oregon.

GIVE EASTERN OREGON SQUARE DEAL

Eight counties in the Willamette Valley have employed during the past five years, 203 teachers who have graduated from the Monmouth Normal as against 39 Monmouth Normal School graduates for the eight leading counties of Eastern Oregon.

During the past five years the attendance of students from nine Willamette Valley counties was 877 students as against 81 students from nine of the leading counties of Eastern Oregon.

Owing to the crowded condition of our one Normal at Monmouth and also the distance and expense of attending, students from Eastern Oregon are compelled to go to neighboring states to secure their training as teachers.

ONLY COSTS 4 CENTS PER \$1,000

The annual maintenance cost of the proposed State Normal School in Eastern Oregon amounts to but one cent of a mill or 4 cents on a thousand dollars of taxable property. Isn't it worth this to have your children trained to become useful and productive citizens?

STRONG ENDORSEMENTS

Among those who strongly endorse the establishment of the proposed Eastern Oregon Normal School are Governor Withycombe, J. H. Ackerman, President of the Monmouth State Normal; W. J. Kerr, President of the Oregon Agricultural College; P. L. Campbell, President of the State University; Robert C. French, former President of the Western Normal, and practically all of the leading educators of the State. J. A. Churchill, Superintendent of Public Instruction, voices the sentiments of those who are most familiar with the need of more adequate Normal facilities when he says:

"Oregon's greatest need for its rural schools is the teacher who has had full preparation to do her work. Such preparation can best come through Normal School training."

"I trust that the voters of the state will assist in raising the standard of our schools by establishing a State Normal School at Pendleton. The location is central, the interest of the people of Pendleton in education most excellent, and the large number of pupils in the public schools will give ample opportunity to students to get the amount of teaching practice required in a standard normal school."

All the above educators insist that a Standard Normal School must be located in a town of 5000 or more population and having enough grade pupils for teaching practice.

VOTE RIGHT

By voting YES for No. 308 you will help to give to the school children of Oregon the same advantages enjoyed by the school children of our neighboring states. Vote YES for No. 308.

NOTICE!

We wish to call especial attention to the club of magazines advertised in connection with our paper. This is by far the biggest magazine bargain that we have ever offered our readers. And as a hint to the wise, we suggest that you avail yourselves of it at once, since we have already been advised by the publishers that on account of the tremendous increase in the cost of white paper the regular subscription price of these magazines will be increased in the near future. Send in your order now and get a double bargain.

WEB REPLIES TO A. B. CLARK

Eddyville, Oregon.

Editor Leader:—

A. B. Clark thinks that the farmers of to-day are so enlightened by the timely perusal of farmers bulletins and by the great attendance of agricultural colleges that they really cannot be helped by a perfectly useless and insulting individual—namely, an agricultural agent.

The farmers of Lancaster county, Pa., are the best in the United States. Everyone knows and admits, and the government statistics prove it. Instead of elevating their noses in disdain and conceit, these numbskulls actually tax themselves to pay a high salary to a good agent, whose duty is to help them be still better farmers. If one finds a better method of farming, the agent induces others to try it.

Instead of cowering under the brutal lash of Mr. Clark's insulting "boss", these farmers welcome him at their farms and ask questions, and learn new kinks every day. They can't get along without their agent. They recognize their own limits, and are not conceited enough to think that they can learn no more.

If the most advanced and prosperous county of the country can learn and prosper still more by hiring an agent, why can't Lincoln county lift itself out of its stick-in-the-mud state and rival some of her neighbors who are really progressive?

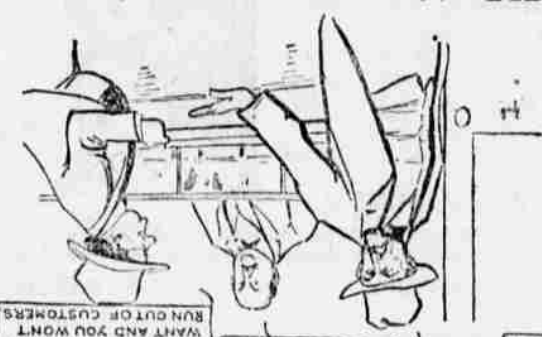

Mr. Clark says that high taxes caused seven families to leave the state for each one that entered it in the past year.

While it distresses me to take issue with Mr. Clark, I firmly believe he is mistaken. In my opinion these new people have struck localities like our own, very much infested by moss-backs, conservatives, and people who shout "high taxes" on the least provocation. This would scare anyone out of the state, leaving said moss-backs, etc., to lick their meager chops and chant for two or three millionaires to come and start ready-to-wear, absolutely-no-taxes industries.

I am conceited enough to call myself a farmer, but not to say that I know it all. I want someone to teach me. And I might add, I read bulletins, etc., a great deal.

Respectfully yours,
Web.
