Brother William of the News seems to be much exercised for fear that the bridge here at Toledo will be built without taking the War Department into our confidence. In fact he devotes more than a column of space to the matter this week, just because—well just because! And someway William figures that if the bridge is built where it would do the most good it would require a draw and bridge tender, but if built at Mill Creek, he don't say anything about their being needed, he just simply thinks that it could be built at Mill Creek alright. Perhaps it would make William feel better if he knew that the plans had been made and submitted to the War Department. And again perhaps he does or does not know that a bridge is maintained across Depot slough, a navigable stream, that has a draw but no bridge tender. That the railroad company has bridges across Mill Four, Depot, and Olalla sloughs, and that all of these bridges have draws in them but no bridge tenders. We are glad to have Bill take an interest in this affair and appreciate his earnest efforts to have the same put through in a thorough and businesslike manner and are sure that the people of the South and East end of the county as well as the people of Toledo will extend to him a sincere vote of thanks for his untiring efforts in behalf of their interests.

SOUTH-ENDERS UP IN ARMS

According to the Waldport Watchman the people of that section are up-in-arms against the location of the proposed Yaquina River bridge at the mouth of Mill Creek. We have talked with people from the Big Elk District, the Beaver Creek District, the Drift Creek District, and those from Elk City and none of them favor the Mill Creek crossing. The business men of Toledo do not favor the Mill creek crossing. All the people who are demanding the bridge are unanimous as to where they want the bridge built and it seems to us that the people who will use the bridge ought to be the ones to say where it shall be located.

Still, in spite of all this, there seems to be an organized movement on foot to locate the bridge at Mill Creek, trying to make a mess of the bridge business, as it were.

The Mill Creek location is not convenient, not logical, and as near as we can figure, would cost considerable more than the lower crossing.

It is not convenient by reason of the fact that all Poole Slough, Beaver Creek, Bayview, Lutgens and Waldport travel would have to travel two miles up the south side of the bay to Mill Creek, just to get to travel back the two miles on the north side, again.

The reason that it is not logical and would cost more is because it would require the building of two miles more road than the lower crossing would. The water is much deeper at Mill Creek, hence requiring much longer piling in the construction of the bridge, and thus adding to the expense. This, together with the two miles of extra road to be built, would run up a big bill of extra expense. Then again the bridge would not give the service at the Mill Creek crossing that it would at the lower one and consequently would be dearer at any price.

As to why this movement is on foot to make a failure of the bridge, we do not know, but are going to try and find out. In the meantime it behooves all boosters for the bridge to put their shoulder to the wheel, and do what they can to get it located right.

Such tobacco enjoyment

as you never thought could be is *yours to command* quick as you buy some Prince Albert and fire-up a pipe or a home-made cigarette!

Prince Albert gives you every tobacco satisfaction your smoke-appetite ever hankered for. That's because it's made by a patented process that *cuts out* bite and parch! Prince Albert has always been sold without coupons or premiums. We prefer to give quality!

PRINCE ALBERT

the national joy smoke

has a flavor as different as it is delightful. *You never tasted the like of it!* And that isn't strange, either.

Buy Prince Albert everywhere tobacco is sold in toppy red bags, 5c; tidy red tins, 10c; handsome pound and half-pound tin humidors—and—that corking fine pound crystal-glass humidor with sponge-moistener top that keeps the tobacco in such elegant trim—always!

Men who *think* they can't smoke a pipe or roll a cigarette *can smoke* and *will smoke* if they use Prince Albert. And smokers who have not yet given P. A. a try-out certainly have a big surprise and a lot of enjoyment coming their way as soon as they invest in a supply. Prince Albert tobacco will tell its own story!
