## Saves Eggs

Royal Baking Powder makes it possible to produce appetizing and wholesome cakes, muffins, cornbread, etc., with fewer eggs than are usually required.

In many recipes the number of eggs may be reduced and excellent results obtained by adding an additional quantity of Royal Baking Powder, about a teaspoon, for each egg omitted. The following tested recipe is a practical illustration:

1 cup sugar % cup water eggs

1 cup flour 36 cup cold water CARE
DIRECTIONS:—Boll sugar and water
until syrup spins a thread and add to the
stiffly beaten whites of eggs, beating until
the mixture is cold. Sitt together three
times the flour, salt and baking powder,
beat yolks of eggs until thick; add a little
at a time flour mixture and egg yolks
alternately to white of egg mixture, stirring after each addition. Add ½ cup cold
water and flavoring. Mix lightly and
bake in moderate oven one hour.

The old method called for 6 eggs and no baking powder

Made from Cream of Tartar, derived from grapes, adds none but healthful qualities to the food.
