### WHITE COAL VS. BLACK COAL

A campaign is on by the Council of National Defense to save coal. While the supply in the U. S. is not lacking, it is now a question of digging and delivery. For several years past the agitation for legislation conducive to the development of the nations waterpowers has been before congress.

Self styled "conservationists" have blocked every move and as a result, millions of horsepower on federal reserves in the west is running to waste either for lack of legislation permitting development or because such legislation as we have is not inviting to the investment of capital.

The present crisis illustrates the folly of policies that force the use of coal, which is gone forever when once it is mined, and withhold from use, waterpowers which are absolutely wasted unless used, and when used are injured in no way whatever.

We should back up the council of national defense in its campaign to save coal and put forth every argument for legislation permitting development of our wonderful waterpowers.

Electricity is the modern method of operating trains, factories, farms, and heating houses; and it is used in numberless other ways.

In addition to these domestic uses electricity will play a most important part in the defense of our country and for that reason alone its development must be encouraged.

Let us all unite to help save "black coal" and at the same time advocate policies which will permit utilization of our limitless "white coal" mines whose millions of horsepower are now wasting to the sea.

### BLUE LAW AND "POLYTICKS"

A municipal court at Des Moines holds the Iowa blue law against Sunday theatres and baseball "unconstitootshunal."

Those who conduct movies and promote the American game are not law violators and those who attend are not criminals.

Thanks for the decision of the municipal judge, but there are yet supreme courts and the Supreme Court of the United States.

If the decision lies between business and industries on one hand and so-called politics on the other—outlook for Blue Laws is good.

### OREGON WEEKLY INDUSTRIAL REVIEW

Our country is mobilizing all its resources, military, industrial, agricultural and financial. The success of each department is vital to the success of the whole and a large measure of this success will depend upon an uninterrupted stream of supplies from our industries.

June 4.—Hood River—T. & L. Co. awarded \$2500 contract for road work.

Portland—14 wooden government ships contracted for at Portland. The G. M. Standifer Construction corporation to build 10 and Peninsula Shipbuilding Co. 4.

Coquille—Contract let on improvement of improvement of Empire to Sunset road.

Pendleton—Work started on Dry Creek fill. O. W. R. & N. has crew of men engaged—will take five months to complete at cost \$50,000.

Turner—Oregon flax industry growing, first retting here by Oregon Flax Fibre Co. yields 17 tons.

Hermiston—Alfalfa farm of 240 acres sold for \$36,000.

Toledo—Eddyville mohair pool on 23,000 pounds goes to McMinville mill at 65 cents per pound.

Roseburg—\$100,000 fertilizer plant may be erected here.

Albany—New ladder factory here doing extensive business. Ships 20 cars since first of year.

Marshfield—Maclean Cannery is 500 cases ahead of the same date last year.

Betson—Buck plant installs plant for light and fire alarm.

Roseburg—Pacific Highway to be improved with 400 cars of gravel to be placed on the roads in several districts. 615,000 acres in Oregon are open to homestead entry.

Roseburg—Oregon Fruit Co. may build cleaning, grading and polishing plant here.

Pendleton—Much wool sold here at 50 cents a pound.

Roseburg—Work will be started at once on \$5,000 dam at North Umpqua fish hatchery.

In the interest of conservation of coal supplies isn't it a good thing to advocate legislation encouraging to the development of waterpower on Federal reserves.

Bandon—Clearing and grading last six miles of Bandon-Curry county coast road was begun. \$40,000 estimated cost.

Astoria—Standard Oil to establish distributing station costing \$150,000.

Crane has building boom. Five business houses and several bungalows are erected.

Cove—Farmers to plant rye. 20,000 acres submerged in Grand Ronde valley.

Corvallis—Contract let for new college library, to cost \$83,300.

Pendleton to have new furniture store.

Portland—Men employed in local shipyards, numbering at present 5060, will draw \$5,100,450 a year, based on an average wage of \$3.50 a day.

Roseburg—New telephone lines will be constructed in Umpqua forests.

St. Johns—Two ship plants will locate here. Preparatory work to begin without delay.

Toledo—Work of diking and putting in dam with flood gates for purpose of reclaiming hundreds of acres of fertile bottom and tide lands lying along the Olalla, commenced.

Toledo—\$4000 halibut fishing schooner launched.

Salem—Wittenberg-King Co. to build evaporating plant here, to cost nearly \$200,000.

Albany—Contract let for paving Baker Street.

Marshfield—Oregon Power Co. to build an extension power wire to Coquille at cost of \$25,000.

Columbia City to have another shipyard.

Forest Grove—Construction work on the extension of the United Railways line from Wilkesboro to Tillamook is now under way.

The demagog howls at h. c. l. howls at high prices and scarcity of food products and then howls at admission of any cheap labor to our country. He is only happy when he howls.

Roseburg—Pendleton men will open new theatre here.

St. Helens—New garage being built here.

Big increase in production of grain crops. Loss reported in acreage in winter planting more than made up in spring wheat sowing. Liberal increase in planting of sugar beets in Washington, Idaho and Oregon during the past year.

Those objecting to a 15 per cent increase in freight rates say that the roads do not need it because they do an increased volume of business. Why not apply the same reasoning to other products which have advanced in price from 25 to 400 per cent, the producers of these goods are doing a largely increased volume of business.

### THE FIFTY DOLLAR BOND

In issuing Liberty Loan Bonds in a denomination as small as \$50 the Secretary of the United States Treasury has put it in the reach of almost every American citizen to do a real and actual service to his country.

Not all can fight, not all can render personal service in other ways, but those who are denied the privilege of serving their country in person have the privilege of serving her by lending their money to win her victories.

But it is not patriotism alone that urges the buying of Liberty Loan Bonds. Thrift and a wise economy in investing small savings commend these Liberty Loan Bonds to small investors. They are safe, and considering their tax-free quality—free from all Federal, State and local taxes (inheritance taxes excepted) are free from any war tax that may hereafter be levied, affording and absolute net income of 3 1/2 percent, they constitute an ideal investment for savings.

Nor is there any reason for waiting for a later bond issue in the expectation of a higher rate of interest being obtained, for the law provides that should such bonds be issued later, Liberty Loan Bonds may be exchanged for them at par.

### AL LANE WRITES

U. S. S. Marblehead,  
San Francisco, Cal.,  
May 29, 1916.

Dear father:—

I received your letter to-day as we just got in from the sea last night at 10 o'clock. We left here on the 20th for the Hawaiian Islands. When we were within 2 days of the Islands we met the German ship which we went after and brought it into port here. They surely have nice warm climate around the Islands. I am getting along fine on this ship. I get along pretty well with the officers. I expect to be raised in rate soon. We have not had any pay day since the 5th of this month. I am going to try to send some money to the bank every month if I can. I guess the Lincoln County Bank would be alright. If you see Hawkins you can tell him about it and you let me know. I am very glad to hear that Frank is having his eyes cured. I would like to see Archie on this ship. What is he a fireman or a seaman. If he's a seaman he's got my sympathy. But a fireman is alright. The engineer officer treats the firemen fine.

I don't know where we go to next. But you can use the same address and I will get the letter alright. The mail is the first thing they send a man after when we reach port.

I will have a picture taken one of these days when in town. We coaled our ship this P. M. and most of us are going to town tonight in a launch. There are 4 warships here now. We had a couple of days of rough weather at sea. The waves rolled clear over our main deck. I am now in town and have a room for the night. I am with a friend of mine who works with me on the ship. He was a traveling salesman before enlisting. I would like to see Archie get on the Marblehead although we now have a full crew.

We walked around town tonight until we got tired then went to a theatre, then to our hotel. I was pretty glad to get to walk around on land again after being out for 9 days. Our ship can't stay away from port very long, about two weeks, then it runs short of supplies.

I have heard it said that we're going to San Diego next for target practice but am not sure.

Well I will close for this time hoping to hear from you soon,  
Your son, AI.

Frank Priest was up from Newport Tuesday.

**"Cured!"**

Mrs. Gus Griffith, of Everton, Mo., writes: "I suffered for three years with various female troubles. My life was a misery. I was not able to do anything... bearing down pains in my back and limbs, and headache... weak and nervous. Dr. — recommended Cardui to me."

**TAKE**

**Cardui**

**The Woman's Tonic**

"When I was on the sixth bottle," she continues, "I began feeling like a new woman... I am now a well woman... I know my cure is permanent for it has been three years since I took Cardui." Thousands of women, now strong and healthy, who once suffered from women's ailments, give Cardui—the credit for their good health. Try it, for your troubles.
