REMINGTON UMC

Wetproof Steel Lined Shot Shells

A NOTED Pacific Coast sportsman who has hunted every-
thing from snipe to black bear, said recently: "The water-
proofing feature now offered sportsmen in Remington UMC
'Arrow' and 'Nitro Club' Wetproof Shotshells, is the most
important improvement made in the shotshell field in over a
decade. The men who perfected the Wetproof system certainly
know shotgun shooting and its requirements from field, duck
blind and traps, as well as from the scientific angle."

Here is something that every man who lives in
a wet climate or does his shooting in the stormy
seasons ought to know about.

These are the first completely wetproof shotshells
—a new and exclusive feature of the Remington
UMC "Arrow" and "Nitro Club" Shotshells.

This is a process that took three years to perfect.
It involved a deeper study of wet-proofing ma-
terials than has ever been conducted outside of
the Remington UMC laboratories.

It means special paper for the shells; a special
formula for the wet-proofing; new equipment
invented to apply the wet-proofing compound.
Virtually a new type of shell—adding to the
shooting qualities of "Arrow" and "Nitro Club"
the hitherto unknown quality of perfect resistance
to wet.

It produces a shell that can be soaked in water
for hours without swelling, and without softening
the crimp—a shell that is as bone dry inside
after soaking as before—a shell that works per-
fectly through the gun in all climates, and can
be depended upon for sure fire, speed, pattern
and penetration, wet days as well as dry.

A shell that you ought to know.
