**Carrying a Ton a Mile for less than a Cent**

Freight rates have played a very small part in the rising cost of living.

Other causes—the waste of war, under-production, credit inflation—have added dollars to the cost of the necessities of life, while freight charges have added only cents.

The average charge for hauling a ton of freight a mile is less than a cent.

A suit of clothing that sold for \$30 before the war was carried 2,265 miles by rail from Chicago to Los Angeles for 16½ cents.

Now the freight charge is 22 cents and the suit sells for \$50.

The cost of the suit has increased 20 dollars.

The freight on it has increased only 5½ cents.

Other transportation charges enter into the cost of the finished article—carrying the wool to the mills and the cloth to the tailors—but these other charges amount to but a few cents more.

The \$10 pair of shoes that used to sell for \$5 goes from the New England factory to the Florida dealer for a freight charge of 5½ cents—only one cent more than the pre-war rate.

Beef pays only two-thirds of a cent a pound freight from Chicago to New York.

American freight rates are the lowest in the world.
