The lumber industry of the United States now has its principal producing center in the Pacific Northwest, where the timber resources are located; it is predicted that the pulpwood producing center of the future will be in Alaska and the Pacific Northwest, for the same reason.

Ford
THE UNIVERSAL CAR

The Garden farmer will find the Ford Model T One Ton Truck an especially valuable factor in his business because of the flexibility as well as the reliability of the service given by this splendid truck. The worm-drive of manganese bronze carries all the power of the motor to driving the Truck, and there are combined in larger and heavier form all the elements which have made the Ford Model T Car the greatest motor car in the world in point of service. The Ford Truck with its worm-drive is most economical in operation and maintenance. There is very little, if anything, to get out of order at any time; there is the simplicity in control; there is the convenience in the flexibility of the car, it will turn in a circle of forty-eight feet; it accommodates itself to narrow alleys, and it "stands the gaff" of hard work day after day, and month after month, to the great satisfaction of the owner. There is hardly a line of business activity where the Ford One Ton Truck is not really a necessity. Come in and talk it over.
