THE UNIVERSAL CAR

## The Quality Car

You think of the Ford car as the LOWEST PRICED car. Did you ever think of it as the real QUALITY car of the world?

Its rear axle is only one inch in diameter; its frame weighs only nineteen pounds; the fender irons are no larger than your little finger, yet a 200-pound man can stand on the extreme end of one of them without bending it.

The entire chassis weighs only 1080 pounds—the lightest automobile chassis in America, so all parts correspond in lightness with those mentioned above. Yet you know from real experience what that wonderful chassis will stand. Its quality and the quality of every part in it is proved by the loads these featherweight parts carry over all kinds of rough roads.

Every part is vanadium or molybdenum steel—with three to four times the strength of ordinary steel because of Ford heat treatment methods.

If freight cars were made of the same quality material they could weigh one-fourth of their present weight and still carry the same loads safely.

"You can pay more, but you cannot buy more" than the sturdy strength and power of the Ford car.

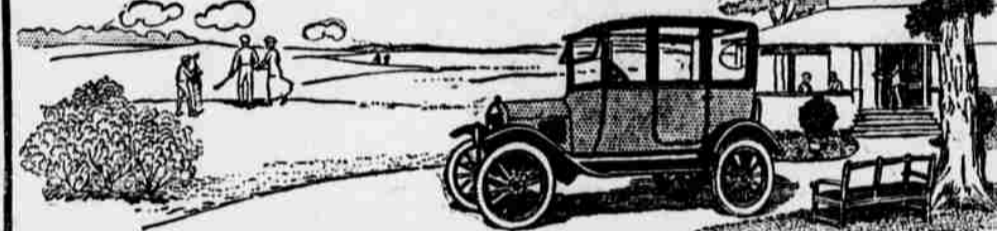

The Ford Sedan has all this quality and strength with the beauty of an electric, the comfort of the enclosed body and a price made possible by quantity production.

Below you will find listed the prices now in effect on Ford cars, F. O. B. Detroit:

Chassis .....	\$380	Touring—Regular .....	\$440	Sedan .....	\$795
Runabout—Regular .....	\$395	Touring—with Starter .....	\$510	Truck—Pneumatic Tires .....	\$549
Runabout—with Starter .....	\$465	Coupe .....	\$745
