VOLUME 30 TOLEDO, LINCOLN COUNTY, OREGON, FRIDAY, MARCH 31st, 1922. NUMBER 6

### SILETZ

County Agent Cooter was over Tuesday and put on the Farm Bureau motion pictures at the Government School building. The house was crowded with an audience anxious to see the first show of the kind ever given at Siletz. The school to the number of 125 pupils formed in procession and marched from the school house to the house on the hill where the show was to be given. Maurice Andersen's new Ford gave the power and flashed on the light. The Ford had not been used for some time and it did not perform as well as it should. Mr. Cooter kept a smile on his face and did not show that he was interrupted in the least. During the interruptions the school children filled in by singing old plantation songs which were greatly appreciated and kept the audience in good humor. Mr. Cooter explained that these films were sent out by the U. S. Department of Agriculture to be used in cooperation with the O. A. C. and the Lincoln County Farm Bureau. The pictures were very fine and pleased the audience, especially the children. These pictures are educational as well as interesting to all who wish to see Oregon advance as one of the great agricultural states of the Union and to see some of the wonders of her matchless scenery. The Columbia Highway is certainly hard to excel in scenic beauty any where in the world. If the World's Fair goes—and we hope it will—Oregon and the Northwest will be advertised as a wonderland of all the world for its scenic beauty, healthful climate, pure water and matchless resources. The people will be glad to have Mr. Cooter visit us again with these films when the weather is more favorable and the bridges are put back again.

THE OREGONIAN NEWS BUREAU—Washington, D. C., March 28.—Senator McNary has introduced a bill to pay Lincoln county, Oregon, \$130,305, the amount which would have been received in taxes for the years, 1919, 1920 and 1921 on the Blodgett timber tract which was taken over by the government for wartime spruce production.
