Too Long Without Paint

Are You Insuring Against Depreciation

THERE'S no middle ground. Either your buildings are well protected by paint or they are going to require costly repairing or rebuilding within a few years.

Paint saves your property. It is an investment in long service—not an expense. The expense results from allowing buildings to rot. Paint now. Save repairs.

The next question is what paint to use. Use the best. It costs less in the long run. It spreads easily—saves labor cost. It covers more surface per gallon than "cheap" paint.

And the best paint will serve you five or more years longer than "cheap" paint.

The best paints are scientific in formula and preparation. We've made them for 73 years—to meet the weather conditions in the West.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.
