Alexander Hamilton.

On the 11th day of July, 1804, the morning sun as it shone on the wooded heights of Weehawken,a couple of miles above Hoboken, across the river from New York, ushered in a memorable tragedy which sank deeply in the minds of all Americans of that day, but whose lesson seems to have been lost as completely as the monument which once marked the spot where Alexander Hamilton fell, mortally wounded by the bullet of Aaron Burr.

With many points of resemblance in the brilliancy of their talents and their career, the two men who stood for one dreadful moment facing each other at ten paces distance with loaded pistols have gone down to after times with wide divergent fames, the victor in the duel execrated as the embodiment of public treason and personal baseness, the other the victim of the legalized assassination still a living influence in the country he helped to establish, and still reverenced not more for personal worth and eminent ability than as the embodiment of an ideal of patriotism worthy of everlasting remembrance.

The bare record of the life and work of Hamilton attests the rarity of his genius and his powers. A captain in the revolutionary war at nineteen, at twenty he was the trusted aide-de-camp of Washington, with the rank of lieu tenant colonel; at thirty he was chosen a delegate to the Constitutional Convention; at thirty two he was our first secretary of the treasury, and created the department. When the country was called to arms through fear of the French invasion Washington refused to assume chief command unless his trusted friend was made second in command. with the rank of inspector general; as a writer he was singularly original in thought, forcible in logic, clear in style ; as a legislator he had the practical gift of wisdom in law making; as a lawyer he easily rose to the head of his profession; as a politician his practical leadership of men asserted itself at every point, and it all came to an end at the early age of forty-seven, through the bullet of a duelist, who robbed his for revenge over a political defeat.

The man who has done so much for his country, and whose career of nearly thirty years of uninterrupted service in the army, the cabinet and the convention, had merely brought him to the prime of life, gave up his life because an indiscreet friend had written in a private letter that Hamilton had declared Burr to be a dangerous man, who ought not to be trusted with the reins of government, and had expressed a still more despicable opinion of Burr. The fatal letter got into the papers, for then, as now, the press was enterprising and delighted in personal scandal, and then began the diplomatic interchange of courtesies which slowly but inexorably, and with the steadiness of fate, led up to the morning excursion to Weehawken Heights, to the ten paces duly stepped off, the question, "Are you ready?" and the fatal signal, and the shot that sent one duellist to the grave and the other to a fate worse than the grave.

Alexander Hamilton was less the victim of that malice which guided the bullet of Burr than of that perverted social sentiment which demanded compliance with the code of honor. He had shown himself to be a brave man on the field of battle; he detested duelling as barbarism; he refused to fire at his adversary, and knew that he was risking his life in a criminal cause. But he knew, also, that he dare not refuse. the last words he ever wrote, on the day before the fatal meeting, he said:

To those who, with me, abhorring the practice of duelling, may think that I ought on no account to have added to the number of bad examples, I answer that my relative situation, as well in public as in private, enforcing all the considerations which constitute what men of the world denominate honor, imposed on me (as I thought) a peculiar necessity not to decline the call. The ability to be in the future useful, whether in resisting mischief or effecting good, in those crises of our public affairs which seem likely to happen, would probably be inseparable from a conformity with public prejudice in this particular.

Recent events seem to point to a revival of that public prejudice, and the country which, seventy-six years ago, was stirred to its utmost depths and shocked by the barbarity of a custom which had cost so dear a life, is almost face to face with the same barbarism again through the acts of men who have learned from the past only its ignorance and inherited only its criminal savagery.

The Woes of Irish Tenants.

The woes of Ireland still appeal to the sympathies of mankind as strongly as during any former period of her history. It is a true figure of speech to call her indeed, to remark that there are faults the Niobe among nations, yet no people was ever more unfortunate or had more reason to complain of the decrees of fate, their dependents; but how great and the oppression of foreign rulers, or the glaring they sometimes are is scarcely follies of her own leaders. The Irish credible. Nevertheless, the following are a generous and impassioned people. whose intellectual qualities should have won them collectively as a nation the place that they have long held individ- other day, a necklace of gold and turually as poets and orators. Such a law, if it were of general application, and not limited as to time would work great hardship to the landlord by removing him from the control of his own property, and putting the county judge in his place. It has, therefore, a limitation to a year or two of time, and

is circumscribed in action to the districts that have suffered most by famine. The reason urged in opposition to it, excellent as it is in motive, yet so completely subversive of the first principles that govern land tenure, can easily be imagined. To people far off, and in the light of cold, hard facts, it seems utterly impracticable. Yet a majority favor it in the House of Commons, and it will have many supporters in the House of Lords. It is opposed naturally by all the Irish landlords, and by every friend of the Beaconsfield administration now sitting in Parliament. The general voice of the London press is also against it as visionary and impossible of execu-
