### How to Judge a Draft Horse.

Mr. J. Minot, French veterinarian, in his book, "Appreciation of the Horse," gives the following directions for the Dissolution of Copartnership. choice of heavy draft horses, says the Journal des Haras:

"The choice of a heavy draft horse is a great deal easier than that of a race horse, yet it is important to know how to distinguish the best, strongest, most enduring, those which feed well, those which are fiery, and those which are

"The draft horse derives his power from several causes, the development of those parts which constitute its bulk, the energy of its muscular action, and the firmness and hardiness of its organs.

"The exterior characteristics of a good heavy draft horse are a large, deep chest, straight shoulders, a little inclined, fleshy, a thick body, yet not too much belly, straight loin, the hind quarters a little depressed, thick through the thighs, and a long pericum. The horse that has a long perieum, prolonged down from the anus, and thick and short muscles of the thighs is very strong and a good draft

"The walk of a heavy draft horse is immaterial; there are draft horses that are quick and those that are slow. The light, quick horses are good for farm work, where the ground is light and even; the heavy, slow horses, with firm tread, are excellent for new, sticky ground and

on bad, uneven roads. "A horse for drawing loads, to be well formed, ought to be high in front, having high and projecting withers, large chest, front legs strong and well spread apart, back and loins straight, hind quarters a little depressed, muscular, short in the With such a shape.

The Mining Outlook in Jackson County. Portland News.

L. D. Brown has returned from a few weeks' visit to Jacksonville. To a News reporter Mr. Brown said last night that work on his quartz mill at Jacksonville was nearly finished and will be in running order by the end of the coming week. The machinery is being placed in posi-tion now. The mill will crush ten tons of quartz daily. Mr. Brown reports that all the quartz mines in the vicinity of Jacksonville are looking well. Over 100 men are prospecting between Applegate and Gold Hill, and are finding good paying rock. This is the first time in twenty years that prospecting has been done in this region. The ledges hold out well and do not decrease in size and richness the further they are down from the grass roots. The mountains back of Jacksonville are a perfect net-work of ledges. The ore is low grade but pays. Mr. Brown returns to Jacksonville Saturday. He says that if the mill now nearly ready
