For the production of grains, such as wheat, oats, barley, rye and corn, our lands are not excelled on the Pacific slope. With proper cultivation, wheat will average from thirty to forty bushels per acre and for size of kernel and weight it will take the premium. Our grown and the yield is from forty to

Our climate might almost be termed that of the "golden mean," being neither hot nor cold to extremes. The average temperature during summer ranges from 70° to 75° above zero. It is a very rare thing that we experience to a very rare thing that we experience to exceed three hot days in succession, and our nights are very pleasant and color nights are very pleasant and color nights are very pleasant and color nights are very pleasant and color. The winters here as a rule are color. The winters here as a rule are prepared to successfully defend them. mild compared with the eastern states. The mean temperature ranging from selves and the mails from the attacks of these road agents, however skillfully planned or unexpectedly made.

This action has been taken at the earnest solicitation of General Supersections. pened two or three times since the setlement of the whites. We have sufficient rains to grow crops without irri-gation, but never an overabundance, as the Willamette valley is subject to. Snow sometimes falls from a quarter

Service, who has already taken steps to carry the new order into immediate ef-fect. It is said that many of the Western railroads have also decided to of an inch to eight inches in depth; arm their train men, and it is expected and it is a very rare thing for it to he on the ground more than two or three that with arms in the hands of train men, express messengers and postal days in succession; but in two or three instances it has been known to remain West will be less frequent in future. for a period of two weeks or more.

Hurricanes are unknown to us and blizzards we never experience. HEALTH. Rogue river valley is claimed to be the most healthful place on the Pacific slope. Malaria and fevers are something rarely experienced, and when found at all it is along water that is stagnant. By a little care, such causes of ill health can be entirely eradicated. It is not an uncommon thing to hear the doctor complain of the exceptional good health which prevails.

CENTRAL POINT. gets itself sung by the poets, but is none the less effective in the world's work for all that. Her husband's death left her with four small children, the yongest of them, the future President General Real Estate Central Point is situated on the line of the Oregon & California Railroad in the northeastern part of township dent being only a baby, on a frontier farm not wholly cleared, and not even fenced. The brave, tiny woman toiled not only at woman's work but man's is nearly in the center of the inhabited part of Jackson county, from whence it derives its name. This town has surrounding it a large acreage of counry, which is very rich and fertile. work, too, to keep her little flock to-First, I would call your attention to the lands north and northwest, which consists of several thousand acres of rich and fertile soil, very productive in gether and save the farm, which was grain and fruits. This country depends entirely upon Central Point for storage or shipment of its products.

On the west Central Point is boundupon taking the oath, to give her his first kiss, it is safe to say that, in the joy and pride of that moment, she felt repaid for all the privations and harded to a considerable extent by hill land

Dr. O. P. S. Plummer, in Oregonian.

of adobe soil the growing of fruits proves successful, and there remain the American Horticultural Society in ves successful, and there remain San Jose, which covered Tuesday, usands of acres of this land which Wednesday and Thursday, were an imwednesday and Thursday, were an immense success—a grand affair from first to last, winding up last night with a barquet which did credit to the ladies of this city and to the people of Santa Clara valley. Valuable papers ion lies in Josephine county.

WATER WAYS.

PACKING MEAT.

[N. J. Shepherd in the Portland Parmer Every year the majority sell them selves short of meat in the fall, and then before the year comes around again they are obliged to buy, and in a majority of cases pay a good round price for the same. It is very rarely the case but that the farmer could put is estimated at \$12,000,000 to \$20,000, away at least a full supply for his own | 000 use, at much less cost than to sell and then be obliged to purchase again. And very often if the farmer is in condition to do it he can put away meat especially pork, and keep until the next summer, and then sell to a good advantage. In this way an increased profit can be secured.

Too many farmers are not in a financial condition to do this, but this is not by any means, a good argument treats that it cannot be done. It does not Byron. require any great amount of skill to it will keep in a good condition. And in most sections of the country it is in good demand. In fact, the usual plan, in by far too many places, is for the farmer to sell nearly or quite all his fattened hogs in the fall to shippers who send them to the cities. Then the next summer this is packed back in the shape of cured meats, for which the farmer or purchaser is obliged to and Cambridge, at a personal expense pay a considerable advance in price over the price in selling; so there is usually very little risk of not being able to sell. On the farm there need be very

little if any waste, and the stock can not only be butchered but the meat salted away so that you can be certain that it will be in a first-class condition. Marion Crawford, the novelist, left the Villa Crawford, at Sorrento, to see the Pope's jubilee in Rome. In order Unless you are well prepared to hanfall. It is not necessary or desirable to have the meat freeze, as it will not take salt near so readily, as when it is thoroughly cooled and then kept at an a while to cool well; this should be done with either pork or beef. If it does not cool sufficiently, so that all the animal heat is out of it by night, Josephine county.

Josephine county.

The soil of Rogue river valley consists chiefly of clay, granite, adobe and loam, all being very productive of grain and fruits of all kinds that the climate of the temperate zero at the country in question takes its name. The meetings, among the rest that "Old Sol" is the best fruit dryer in central California. An excellent peach raiser, Mr. Smith, of Vacaville, said thirteen portunity will be afforded to get all the animal heat is out of it by night, take down and cut up and lay out up take down and cut up and lay out up take down and cut up and lay out up take down and cut up and lay out up to portunity will be afforded to get all the animal heat is out of it by night, take down and cut up and lay out up to portunity will be afforded to get all the animal heat is out of it by night, take down and cut up and lay out up to portunity will be afforded to get all the animal heat is out of it by night, and way to combine the animal heat is out of it by night.

til it is thoroughly cooled. With pork | blue diamond, which is worth \$150,000 grain and fruits of all kinds that the climate of the temperate zone will permit.

FRUITS.

FRUITS.

FRUITS.

Fruits, such as apples, peaches, pears, plums, cherries, apricots, prunes, grapes; (of all kinds), strawberries, blackberries, gooseberries, etc., are grown in abundance and of a quality unsurpassed in the Union for size and state of the temperate zone will permit.

FRUITS.

Fruits, such as apples, peaches, pears, plums, cherries, apricots, prunes, blackberries, gooseberries, etc., are grown in abundance and of a quality unsurpassed in the Union for size and state of fifty miles, unsurpassed in the Union for size and state of the temperate zone will permit the celebrated watermelons raised by G. W. Jackson, from whose farm the the sun drying peaches in from two and a half to four days, the fruit first being halved, pitted, exposed to the sulphur fumes thirty minutes, and the trays laid on the ground in the sun.

Peach trees bear so abundantly that the fruit must be well thinned once, and often twice, to save the trees and sprinkle plenty of salt over it as it laid.

All along the north bank of Rogue river are grown the celebrated watermelons raised by G. W. Jackson, from whose farm the the sun drying peaches in from two and a half to four days, the fruit first being halved, pitted, exposed to the sulphur fumes thirty minutes, and the trays laid on the ground in the sun.

Peach trees bear so abundantly that the fruit must be well thinned once, with the celebrated watermelons raised by G. W. Jackson, from whose farm the the sun drying peaches in from two with beef I prefer to use good common salt, but with beef I prefer to use a little salt being halved, pitted, exposed to the sulphur fumes thirty minutes, and the trays laid on the ground in the sun.

Peach trees bear so abundantly that the fruit must be well thinned once, with the sun drying peaches in from two with beef I prefer to use a little salt being halved, pitted, exposed to the sulphur fumes thirty minutes, and the trays laid on the ground in th and often twice, to save the trees and secure first-class fruit. Mr. Smith, for curiosity, counted the peaches thus

rubbing of salt be given. If this is carefully done, ordinarily, this is all that will be necessary until it is ready Sticky, Little Butte, Big Butte and Table Rock countries passes through Central Point, and in order for the people living in the last mentioned places ple living in the last mentioned places one field near Suisun, 731 acres of fruit One fie

put on a board and weight it down. In about ten days or two weeks the brine should be taken off and fresh green fruit. He shipped twelve car loads of dried fruit of ten tons each East, and sold the remainder of the control of the co loads of dried fruit of ten tons each East, and sold the remainder to canners.

Senator Buck has 400 acres in fruit near Vacaville, and is planting 400 acres more near Lodi, of peaches, aprifull supply of meat.

an acre for large contracts and \$35 for mills and nearly 21,000,000 feet from trumpery and pitch his coat into The wool of the same year amounted for each kind.

Truly, this is a great locality, this woolen mills of Oregon and the bal-
