Condensed from Wm. A. Hammond People die through their ignorance of the laws which govern their exist-ence and also from their inability or indisposition to obey those laws with

which they are acquainted I do not see that there is any physiwith the first bull, fire suddenly broke out on the sanny side of the plaza. A panic seized upon the vast assemblage, and a frightful extent was a seemblage. years ago, and from the advance of medical science leading to better methods of treating deviations from the normal standard of health to which we are subject, the life of a generation has within the period mentioned been lengthened from five to six years. That is, the average man instead of living 30 years as he did 50 years ago now lives nearly 36 years. Looking at

with an eternity of time his life also will be eternal. We know that this life is continued charred as to be unrecognizable, were through the death of the various atoms of the several tissues that enter into the composition of his body. The organs are kept in action by force and this force from the metamorphosis of knocked down and trampled upon by matter. Thus to obtain heat we burn evolved in the process; to generate electricity we convert zinc or some the liver, the muscles all act through posed. With every thought that eman-ates from the brain, with every act of the will which it originates, with every perception which it experiences, a certain portion of the cerebral tissue is broken down into simpler substances and through various channels is execreted from the body. With every pul-

> of the system to make room for new The food that a man takes ought to be such as would exactly repair the losses which his body is suffering. If

could be seen edging over the side of the car. Suddenly a cry went up "He's jumped," and the crowd watched to see the man dash himself to pieces. The parachute failed to work at first, and the daring aeronaut was seen diving to earth with lightning speed. A moment more, however, the umbrellashaped life preserver opened its wings, and Hogan's rapid descent was checked. From that point he dropped slowly and reached the earth safely at a point floor of the house where circumlocuted in the car. Suddenly a cry went up "He's the crowd watched to see the the self from going down, he draws every much the car. Suddenly a cry went up "He's the dot fifty-six years old it might be muscle and sinew taut, and if the wrench is too severe the bone breaks. There is no way of definitely proving it, but it is asserted, and I believe with some show of truth, that some, at least, of the muscle and sinew taut, and if the wrench is too severe the bone breaks. There is no way of tennitely proving it, but it is asserted, and I believe with some show of truth, that some, at least, of the muscle and sinew taut, and if the wrench is too severe
