nanufacturing States of the Union. I could readily advance other illustra-tions to the same effect.

As I have already intimated I am here to speak of the expansion of our foreign trade, not by any novel process, not by any mode that will shock or disturb home industries, not by any Piqua, O. Sold by T. K. Bolton. mode that will invite our people to rash experiments, or that will launch us in doubtful and dangerous invest-

claim its victories. Without

valuable to examine into the sources of our imports and the destination of our exports and to strike a balance be- friends to the whites. tween the two. Take last year-1889. the countries in the three continents-000 in our favor, equivalent to that amount of gold among our people. But when all the accounts were closed instead of having \$129,000,000 in our favor we had a balance of \$13,000,000 band, in company with A. B. Meacham, against us from our foreign trade. at that time one of the peace commis-

you. We lost \$41,000,000 in Cuba, from which our imports were \$52,000,-000 and to which our exports were only \$11,000,000. Forty-one millions of dollars is a large sum to lose in one island in a single year. In the republic of Brazil we left \$51,000,000 more. Our exports to Brazil were \$9,000,000. In Mexico we lost \$10,000,000. Our imports from Mexico were \$21,000,000 and our exports to Mexico \$11,000,000. To sum it all up, our imports from countries south of the finest housekeepers in the country.

Maggie was respected and kindly United States were \$216,000,000, and our exports to them were \$74,000,000. The balance against us in our trade with these countries therefore is \$142, 000,000, exceeding our grains from all the rest of the world by \$13,000,000. By no figure of speech can we flatter ourselves into the belief that our trade want any of the old and superstitions with our American neighbors is in a customs observed at her grave. In prosperous condition. How can this state of affairs be remedied?

"You have heard a great deal said again until the revision of 1883 left scarcely a trace of the actual tariff that was in operation at the close of the war and for a few years afterward. wild scenes and associations of her During the war we were compelled to tax almost everything in the air, in the water, on the earth and under the earth. The necessities of the Gov ernment were so great that we could allow scarcely anything to be imported without paying tribute, and I think that no patriotic man can deny that | Syrup did me m that no patriotic man can deny that that was a wise policy. We were not then studying the philosophy of trade relations, but how to save the life of the nation. Money was the primal necessity, and we seized it wherever

we could reach it lawfully. "But during the last eighteen years a great change has been made. So entirely has the war tariff been abolished that in the fiscal year ending June 30, 1889, articles admitted free were considerably more than one-third of all imported articles that paid duty exceeded \$453,000,000 in value, and imported articles that paid no duty exceeded \$453,000,000 in value, and imported articles that paid no duty exceeded \$453,000,000 in value, and imported articles that paid no duty exceeded \$453,000,000 in value, and imported articles that paid no duty exceeded \$453,000,000 in value, and imported articles that paid no duty exceeded \$453,000,000 in value, and imported articles that paid the second articles administed the largest particles administed the largest particles administed the largest particles administed the largest particles are particles and the largest particles are particles and the largest particles are parti ported articles that paid no duty exceeded \$236,000,000 in value. The inevitable tendency is, I think, toward an increase of the free list. Our an increase of the free list. Our great mistake was made when we began to repeal the war duties on so large an amount of imports. Any duty repealed was a favor and advantage to the exporting country, and we have asked nothing in return.

Instead of this course with a Blood

the nose to the tip of the tail, another curiosity not common to this animal we are informed.—[Grant's Pass Courier.

Blood Poison Cured.

I was troubled for years with a Blood

A Word to Ladles.

Instead of this course, which, I Instead of this course, which, I must say, was one of carelessness and wastefulness by both political parties, every repeal of duty should have been preceded by a most thorough investigation and well, This was constituted by the very best physicians of Louisville, Ky., and Evansville, Ind., but they failed to benefit me in any way.

A few bottles of Swift's Specific (S. S. S.) cured me sound and well, This was For Harrows and Plows Constantly on Hand. For Harrows and Plows Constantly on Hand.

urchase annually to that amount The richer country cannot expect to get complete reciprocity in the same wealthy, but whatever we should have received would have been clear gain, and in all future repeals of duties whatever we may be able to get will be clear gain. It is not a question of getting deliberately to work to estabhan reciprocal exchanges, but with all the duties we have thus far reer we should get something or get

"We have chosen, with our eyes closed, to get nothing. I hope now, with our eyes open, that we shall in highest duties is to enlarge the area of its foreign trade. Under the beneficent policy of protection we have developed a volume of manufactures, which in many departments overrun the demands of the home market. In the field of agriculture, with the immense the future choose to get something. We encounter opposition to this policy from those who declare that if we enter into reciprocity of trade with propulsion given to it by agricultural implements, we can do far more than produce breadstuffs and provisions for our own people. Nor would it be an ambitious destiny for so great a country as ours to manufacture only what

what is predicted. We may enter inwe can consume or produce only what we can eat. We are already, in many yond that; and our great demand is expansion. I mean expansion of trade with countries where we can find pro-

volition of people who might ask for the priceless boon of a place under the flag of the Union. I feel sure that for a long time to come the people of the United States will be wisely content with our present area and not venture upon any scheme of annexation. At the same time I think we should be no wisely content if we did not seek to the priceless boon of a place under the fing of the Union. I feel sure that for a long time to come the people of the United States will be wisely content with our present area and not venture upon any scheme of annexation. At the same time I think we should be no wisely content if we did not seek to the priceless boon of a place under the fing of the Union. I feel sure that for constructions with all other countries on all things is to my mind as absurd as to say that if I buy a horse to-day I must necessarily buy a drove of asses to-morrow. All objections of that kind are, I am sure, unfounded, and will not stand the test of argument or practical trial.

The contract price was \$1,420,000, while that of the Philadelphia was speed, and when I went out to see who it was there stood Jake Warren, volition of people who might ask for endangered in this country it is like-

Have no appetite, feel tired all the time, sleep does not refresh you, feel weak and listless, have dyspepsia, have cold hands and feet, are constipated, and, in fact your system is all out of order, take—since the Federal Government was organized. Happily the great majority of our people, without strict regard to party lines, believe that the results to the American people from a protective policy have been incalulably beneficent, aggregating in a quarter when we have lost a much larger amount during the same period. The speed will be accounted so serious an event when we have lost a much larger amount during the same period. The speed will be at least fifteen knots. A protective policy have been incalulably beneficent, aggregating in a quarter when we have lost a much larger amount during the same period. The speed will be at least fifteen knots. A protected cruiser of 7300 tons and a speed saw that some corn had been blown down, and, entering the field, by the field was the field was the field and the time and the lost of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone out of the country within the last three months have gone of our f-inch breech loading rifles.
