It is one of the notable signs of the ed the values of changed conditions of American life, that whereas Fourth of July orations were formerly marked mainly by florid boasts of the golden future before us' they are now largely made up about warnings of dangers ahead.

The N.Y. Recorder printed 4th of July patriotic sentiments from the various we use, if we Governors in the Union. Pennoyer gave them this shot:

Salem, Or., July 3d .- The grave fact that the newspaper press of the country is has repeatedly stated, without official denial or public protest, that the President of the United States is using the be federal patronage to influence Congressional action favorable to his wishes on financial question, is most unmistakeable evidence of national decadence.

SYLVESTER PENNOVER.

The Yreka Journal, speaking of the extra session of Congress which is to convene in August, says that probably the President considers the Geary bill an unwise law, which he has set aside more arbitrarily than the Czar of Russia would dare to do. He would probably set aside the Sherman bill in the same manner, but for fear of impeachment, yet had Harrison ignored the Geary act as Cleveland has, there is no doubt that Geary and his fellow Democrats, aided by several Republicans, would present articles of impeachment. In the coming session, Cleveland may desire the Geary act repealed, and those who object on the Democratic side, may expect to be W deprived of the loaves and fishes for their any propolitical friends.

Besieged the Banks

Denver, July 18.-No scene was ever witnessed here before like that of this of morning, shortly after the hour when the an banks opened for business. The failure of three savings banks yesterday had excited the masses, and at the hour of opening the streets were crowded with anxious depositors. Eleven clearing-house banks located within four blocks of each other were surrounded, and far into the streets crowds gathered until the police were called to clear the way for traffic. At 10 o'clock the Union National, with a capital of \$1,000,000, posted a notice that they would not open their floors. This started the panic, and fol-lowing quickly the Commercial National posted a similar notice, and then the National Bank of Commerce. A run immediately started on all the although to no great extent People's National. The First National appears in unexceptional condition, hav-ing over sixty per cent. of the deposits on hand, with a private fund of \$1,500,000 in addition to draw upon, making it impossible to close their doors. The Colorado National and several others equally as good. The crowd withdrawing their money are all small depositors. banks are paying all demands except on time certificates, demanding that those remain until the expiration of their time. The five banks which closed their doors today are the National Bank of Commerce, which is believed to be solvent; the Union National having SL. 600,000 in securities and owing but \$500,-000; the Commercial National, with a capital of \$250,000; the American National with a capital of \$2,000,000; the Mer-
