Crater Lake Club.

The Crater Lake Club will meet at the parlors of Hotel Oregon at 7:30 p. m., this Monday, Sept. 23, 1895.

The purposes are of the highest importance to Ashland. Ladies and gentlemen who desire to see Ashland made the health and pleasure resort of Southern Oregon, are urged to come out. As a business proposition it is paramount.

Twelve Tons of Butter.

Jas. Taylor, Edw. Casebeer, Ezra Jay, Rob't, Irwin and Wm. Davis arrived in Ashland Saturday with 24,000 lbs, of Klamath county dairy butter, and loaded a car here for Portland. They shipped 30,000 lbs. to the S. F. Market last week. The parties live in Sprague river and Barnes valleys and Dry prairie.

Willits and Eugene Berry, with Mrs. Dr. Parson as accompanist, composed the choir for the occasion. The new church has not been entirely finished but is very nearly so, requiring some painting yet and the pews with which it is to be fitted have not yet been put in place. The church is not a large one but will be cozy and comfortable. It is constructed in modern style. The interior side walls are finished in plaster, overhead the finishing is in natural wood. W. J. Schmidt furnished the plans and had the contract for the building and he was highly complimented by the Bishop for his skillful work.

The young people of the M. E. church are to meet this evening to organize a Chantauqua circle, the first to start the ball rolling in that line in Ashland for the coming year. G. F. Billings has received the five new books included in the Chautauqua reading course for the coming year. This year is what is called the American year and ought to be particularly interesting to all. The TIDINGS would take pleasure in recording the formation of a half dozen or more circles in Ashland this fall and winter.

"Your attention is called to a new enterprise at Ashland that is of material importance to this valley, viz: a foundry and machine shop. Messrs. Tutthill, Fenton and Costel have united their forces at Ashland and as a result have a complete foundry and machine shop.

Mr. S. J. Tutthill is inventor and pat-

entee of the Tutthill water wheel and a large share of their work at present is in filling orders for wheels, although all manner of iron and brass castings are made to order on short notice. From one to any number of horse power can be generated. Wheels are made from four inches in diameter to ten feet in diameter. Messrs. Tutthill, Fenton & Costel have a wheel nearly ready for shipment that will furnish 120 horse power with a pressure of 150 feet. The beauty of this new motor power is its perfect adaptability to this country, its simplicity of construc-tion, its lightness and durability. A wheel capable of furnishing from three to ten horse power can be easily packed in a valise, while the 100 horse power wheel can be carried on the back of the ordinary cayuse. J. M. Luark furnishes a big peach story that is hereby dedicated to our Wil-lamette valley friends and the public generally. From one tree growing in his lot on Granite street, Ashland, this season he has picked 130 lbs of peaches. They are of a late cling variety and the other day he selected 32 of the choice ones and brought them down town. They tipped the scales at 23 lbs, 12 ounces, or an average of 12 ounces each for the whole number. Mr. Luark says he thinks the entire product of the tree averaged over half a pound in weight for each peach.
