# Quality and Price

It is not altogether a matter of price in buying. Nowadays people do not argue so much over price as over quality, style and value. Prices are pretty well regulated by competition, but quality and style depend, to a great extent on the ability of the buyer to select the RIGHT things. You can depend upon what you find at this store being of quality as represented, new in style as well as age, and priced right, too. If an article begins to lag here, you will find a "move on" price on it at this store.
