

Where Is the Money?

You have earned all these years?

Gone! Frittered away! Spent, with nothing to show for it!

But SOMEBODY got it and BANKED it. You may be sure of that.

Well, what's done is done. From this time on, tho', put your surplus money in this bank for savings and we will add four per cent interest to it. Guide your footsteps to this bank this very day.

One dollar is all you need to open an account here.

Granite City Savings Bank

Ashland, Oregon.

Misses Gertrude and Lena Bieda and Miss Belma Clark were at Medford visiting friends Sunday.

New assortment of messaline silk petticoats on special sale at Minkler's.

George A. Fox of Talent was in the city Saturday on business.

Why this Bank does not exclude Small Accounts

Every one with an income needs the assistance of a bank in order to administer it.

People who begin to bank in a small way often develop into clients whose transactions are large.

It is most difficult to carry forward one's enterprise if he handles his funds in actual cash.

When this large, strong bank extends its facilities to the small depositor it helps build two successes—its own, and the depositor's.

Call and open an account, even if it must have a modest beginning.

Citizens Banking and Trust Co.

"The Bank That Helps the People."

ASHLAND, OREGON.

Capital \$50,000 Surplus \$5,000

H. F. POHLAND, Pres. R. P. NEIL, Vice Pres.

Admission Free to All

R. Borton went to Hornbrook to spend Sunday.

If you want a good homestead inquire at 111 Coolidge St. 76-2t*

Mrs. W. P. Barbee of Marshfield is visiting at the home of her mother, Mrs. Frank W. Chamberlain.

The living pictures presented at the Art and Loan Exhibit will represent famous beauties of long ago, copies of masterpieces as well as portraits of living celebrities.

Mrs. F. D. Swingle has returned from a visit of five weeks in California and Nevada. She reports ice in Phoenix last week and an inch and a half in Pasadena, Cal., during the January cold spell.

Simpson & Phipps finished their contract for putting in the water mains for the Talent municipal system Saturday night. The work was to have been completed last fall but was delayed by failure of the town to get the pipe there and afterwards by bad weather.

Drs. Sawyer and Kammerer went to Medford Saturday evening to be present at the organization of the Rogue River Valley Osteopathic Association. Those present were Drs. Daw and Daw of Central Point, Drs. Carlow, Carlow and Howard of Medford, Drs. Sawyer and Kammerer of Ashland.

The seven-weeks-old babe of Mr. and Mrs. R. H. Dickey of Porterville, Cal., who have been visiting the past week at the home of Mr. and Mrs. H. H. Gillette, died Sunday evening of erysipelas. The remains will be taken to Porterville for interment by the bereaved parents, who have the sympathy of the community in their sudden loss.

A few of the attractions at the Art and Loan Exhibit are a dress over one hundred years old, in good state of preservation, worn by a lady considerably less than a hundred, who will preside over a spinning wheel of uncertain age. A curious old Chinese sword, an antique plate and silver spoon brought from Germany and marked 1804, a Bible over two hundred years old, along with Mexican curios and Indian rugs and baskets.

February 22, afternoon and evening, the Wednesday Afternoon Club invites you to the Art and Loan Exhibit, the admission in the afternoon being 10 cents. In addition to the exhibit in the evening a program will be given and the living pictures displayed. For this additional attraction the entrance fee is 25 cents. No one should miss attending this entertainment. It is the most elaborate celebration of February 22 the club has yet undertaken.

ESSENTIALS OF ROADS

State Highway Commissioner of California Gives Practical Directions as to Requisites.

According to Austin H. Fletcher, state highway engineer of California, the essentials of a modern rural highway are as follows:

A readjustment of the road locations or rights of way so as to secure proper alignment and to obviate the necessity for traveling around so many section corners.

The elimination of all crossings of highways at grade with steam and electric railroads.

Rights of way of uniform width, preferably not less than 60 feet.

Maximum gradients in the mountainous country at 7 per cent and minimum radii on the center lines of such roads of 50 feet, with all curves opened out as much as possible by flattening slopes and removing brush and such trees as interfere with the view. A clear sight of at least 150 feet should be secured wherever it is practicable.

The construction of permanent culverts, gutters and ditches wherever they are needed to prevent water from standing on the road sides and on grades to prevent gullying due to the water being carried too far in the gutters and thus accumulating in volume.

The construction of bridges of a permanent character, preferably of reinforced concrete, such bridges to be at least 24 feet wide in the clear and so designed that they will carry 16-ton traction engines with a reasonable factor of safety.

A minimum width of roadway of 16 feet, which may be traveled safely, such width to apply only to those places in the mountains where there is so much rock as to make a greater width prohibitive on account of its cost. An average width throughout the remainder of the state of 24 feet on embankments, or 22 feet in through cuts and 22½ feet where the road is part cut and part fill.

A crown or cross chamber varying from one inch to the foot where no surfacing is applied to less than one-eighth of an inch where bituminous surfaces are used, in all cases the crown to be the least needed to cause the water to run quickly from the road into the gutters.

Such type of surfacing as the needs of the locality varying from the graded road to the highest type of asphalt paving and varying in width from 15 to 24 feet.

The erection of guard rails at dangerous points on grades and on high embankments. In places guard banks of earth are preferable to the wooden fences because of their greater permanency.

The proper trimming of slopes along the road sides, both old and new, so as to prevent the unsightly gashes now so noticeable along the roads. Also the planting of suitable trees, indigenous to the locality, and properly caring for them.

The placing of proper permanent monuments at the time of construction along the roads to mark accurately the limits of the right of way. Such monuments will be of inestimable value to surveyors. Also the erection and maintenance of guide boards marked to show places and distances accurately.

A proper system of maintenance for the upkeep of the roads after they are built, coupled with adequate appropriations of money. Such appropriations and such a system should be provided for even before a road is completed, since even if the wearing surface requires no expenditure for some time—a rather unusual condition—the gutters, culverts and slopes always will need attention.

Tut! Tut!
"Milligan's back from the cure. I saw him this morning and he looked as though he had a dash of spirit in him."
"Yes, I saw him this afternoon, and he looked as though it was a quart."—Detroit Free Press.

There are several points in the United States where the average hourly velocity of the wind is greater than that of Chicago, which is known as the "Windy City," but Chicago has a maximum record which has been exceeded but once.

Mr. Caven of Wood was over visiting friends over Sunday.

Mrs. H. G. Eastman leaves today for Modesto, Cal., to visit her parents, Dr. and Mrs. H. E. Hosmer.

J. M. Anderson and family and George T. Huffman and family, who have been visiting in Ashland for some time, have gone to Grants Pass to visit.

Mrs. Lavina Mingus, who has been at Cazadera, Ore., for some time, has returned to Medford, where she will remain for a couple of weeks before returning to her home in this city.

NEW CORPORATION FORMED.

Rogue River Public Service Corporation Organized.

Medford Sun: A letter to the Commercial Club from George Sanders, who is at present in Chicago, announces the organization of the "Rogue River Public Service Corporation," the purpose of which company is announced upon the printed letterhead as the manufacturing of hydro-electric power and current and the providing of water for irrigation and for domestic purposes. George Sanders is president of the company; Frank M. Favre, vice-president; Ovando C. Beebe, treasurer; Robert E. Gaut, consulting engineer, and George W. Soranson, secretary. The principal place of business is Grants Pass, Ore., but offices are maintained at both Chicago and Indianapolis, and the company is incorporated under the laws of the state of Oregon.

It is said that the new company has its plans well along toward maturity for the taking over of the ditches, dam, etc., of the old irrigation company, and will soon be in a position to assure the Rogue valley an adequate supply of water for irrigation purposes. It is also a part of the plan of the company to develop the waterpower of the Rogue and sell electrical current. Mr. Sanders is expected to return to this city in the near future and assume direction of the development work.

The Chump.
"Where's your friend Payne?"
"Gone to Arizona."
"What for?"
"To regain his health."
"How did he lose it?"
"Earning enough money to go to Arizona."—Boston Herald.

In 19 months the number of special institutions that teach agriculture in the United States has increased from 545 to 875, or over 60 per cent.
