INVESTIGATE LOBBYIST

Senators Going After Mulhall, the Alleged Lobbyist of the N. A. M., and Others.

Washington, July 17.—Investigation of the inner workings of the National Council for Industrial Defense, organized, it is alleged, to finance legislative lobbying under the direction of the National Association of Manufacturers, is the announced determination today of Senator Lee S. Overman of North Carolina, chairman of the senate committee investigating President Wilson's "insidious lobby" charges. He plans to have expert accountants examine the organization's books and prepare a financial summary and also to reveal the names of all contributors.
Martin M. Mulhall of Baltimore, self-styled lobbyist for the National Association of Manufacturers, resumed the stand today, discussing the days preceding the republican national convention of 1908. Letters read to the committee indicated that frequent conferences were held between managers of former President Taft's campaign and representatives of the N. A. M. It was alleged that certain members of Taft's managers warned President Van Cleave that Samuel Gompers, president of the American Federation of Labor, was urging an anti-injunction plank and suggested that Van Cleave and others attend the convention and prevent its endorsement.
In April, 1908, Mulhall declared he wrote Frederick Schwedman, then secretary of the N. A. M., that James Wilson said that if Taft was nominated for president he (Watson) could not be elected governor of Indiana. The witness then told of a conference he had with the late Vice-President Sherman, then a congressman, the latter urging the N. A. M. to stop the attacks in republican newspapers on former Speaker Joe Cannon. Mulhall said he then left Sherman and went to former Senator Foraker's office and found a secret conference of republican senators in progress.

It was decided at this conference, according to Mulhall, to not enact any further legislation desired by Colonel Theodore Roosevelt, then president. He alleged Foraker told him the "allies" planned to defeat Taft's nomination, capture control of the national committee and seat contesting anti-Taft delegates. To offset this, Mulhall alleged, Watson told him later, Roosevelt was "moving heaven and earth to nominate Taft," and was fostering attacks on Cannon to kill the latter's presidential boom. Mulhall said Watson threatened to "expose the Roosevelt plot on the floor of the house."
On May 6, 1908, Mulhall says he called on Watson and Senators Carter, Hemenway and Aldrich, all "chatting pleasantly" and all saying unfair legislation would not pass the senate. Mulhall said he wrote Schwedman that Beveridge had said the N. A. M. would have to accept an amended Sherman trust law, an anti-child labor law and an anti-injunction law. Mulhall said he then saw Hemenway and wrote Schwedman as follows:
"Hemenway told me if I saw Beveridge again to tell him he was talking through his hat, and a damn poor one at that." Watson confirmed Hemenway's report, saying Beveridge was crazy.

On May 7, 1908, Mulhall said he accompanied Watson to Baltimore and en route Watson said that he (Watson) and Cannon had started the scare about anti-injunction legislation and an amendment to the Sherman law to head off tariff legislation. On May 8, Mulhall alleged, Schwedman wrote him that Beveridge's influence was waning, adding:
"It always is disagreeable to me to think we have anything in common with men who are wrong on the labor question as Beveridge is. However, we never know who our bedfellows are. Watson is a man after my own heart and we will help him in every way."

SPECIAL CLUB MEETING

There Will be Eats and Important Business at the Meeting Next Monday Evening.

Secretary Seager has sent out the following notifications to the members of the Ashland Commercial Club:

The monthly meeting of the Commercial Club, adjourned from July 7, will be held Monday, July 21, at 8 p. m.

The members have shown their loyalty and generosity toward the organization and our city by the payment of dues and subscriptions to funds for public enterprises. But more than this is needed. At almost every meeting there comes up for consideration some proposition affecting the interests of the entire section, and such matters should have the careful consideration of all our members, for in this way only can we secure the best results for all concerned.

While land settlement and sale is lagging let us get together and work for closer co-operation, larger production and efficient methods of marketing products, so that when the influx of new settlers again commences we will be in shape to show them a happy, prosperous and self-supporting community.

Business of importance to be considered. Light refreshments. Be sure and come.

GEORGE W. SEAGER, Sec.

Parachute Jumper Killed in Seattle Sang at Opera House in Ashland Two Years Ago.

Seattle, Wash., July 19.—Francis L. Thayer, aged 47 years, a parachute jumper, known throughout the west, was drowned today while making a parachute descent from an aeroplane as part of the Potlatch air sports.

He went up in an aeroplane with Johnny Bryant. At a height of 750 feet he dropped from the aeroplane. After a descent of 100 feet he broke loose from the parachute and fell to the water.

Thayer did not rise to the surface after going into the water. He had been giving parachute exhibitions 25 years. Thayer called Chicago his home. He leaves a widow in Seattle and relatives at Aberdeen, Wash.

Thayer was in Ashland for some time in 1911. He came here while recovering from a broken leg received in a parachute drop and while here sang in the Opera House under the Hecker management. Thayer left the city in company with a stock company organized here, and with which Mrs. Hecker played for a time.

NOTICE.

Please get your items for the Tidings in the day before date of publication, if possible. All matter must hereafter be in type by noon on publication day.

The present rate of timber cutting in this country is three times that of the growth.

Illinois leads in the amount of internal revenue receipts.

Almonds are high in nutritious quality.

Mulhall declared he went to Portsmouth, Ohio, and broke a strike there of 3,000 shoeworkers. He said he entertained the strike leaders, bought the union's entire secrets and ended the strike within three days.

The witness declared that on May 29, 1908, N. A. M. headquarters wrote him that they wanted "the right kind of congressmen" elected in the Tenth and Eleventh Pennsylvania districts, and wanted Cannon of Illinois and Jenkins of Wisconsin re-elected. Many letters that Mulhall wrote to headquarters appealed for financial aid for Jenkins, "one of our best friends."

Once, Mulhall said, Jenkins did not have sufficient money to pay railroad fare and money was rushed to his aid. He told of paying Henry Neal, one of the speaker's messengers, to keep him informed regarding the speaker's visitors.

A score of letters and telegrams, arranged chronologically, were read, purporting to show that the N. A. M. officials were in constant touch with republican leaders both before and during the 1908 convention. Emery, one of the letters said, was "in touch" with the committee on resolutions ten days before the convention met.

The president of the N. A. M., Mulhall said, and the executive board attended the convention, and when the ticket was selected all the resources of the N. A. M. were used to aid Taft and Sherman.

Farewell Meeting With Professor Larimore.

Friday morning a large number of people, including 100 or more of Ashland's brightest children, met in the arbor to listen to Professor Larimore as he bid farewell.

He said he was always delighted to work with the children here because they were enthusiastic and less under the influence of evil. He said he had found but one boy whom he had been compelled to check for a bad habit.

In his talk to the mothers present about their girls he said, in substance, that the modern mother should beware how she dressed her young daughter if she would keep her virtuous. That today the X-ray gown, the slit skirt, the open-work stocking and other exposures were wrecking the modesty of girls and starting them on the road to ruin, and he raised his voice in protest and warning. He declared some of the dresses he had seen on the streets of various cities were a disgrace and reflection on womankind, and that the fault lies mainly with mothers, who are capable of knowing more than their young daughters of its evil effect on health and morals, and said the present immodest styles should be criticised without mercy.

He then turned his attention to the boy and the cigarettes. He said he was glad so few boys used them in Ashland in his athletic class. Many of the cigarettes, he found by analyzing, contained saltpeter and other harmful drugs. Then there is the "dope" cigarette, sold in every town, that contains cocaine. The newest in the line of cigarettes are those so compounded that they arouse the animal passions. He has seen little boys victims of the latter, and the results from the same have made him feel like falling to the ground and covering his face in the dust.

He then touched upon the splendid \$250,000 Y. M. C. A. in his home town, San Diego. There he is physical director. He said it was the rule there, when a young man applied for membership, to examine him physically. He was not to avail himself of the splendid advantages of bathroom or various swimming tanks until he had taken a strict physical examination for infectious disease. This protected the members from eye or skin ailments. After that his heart pulsation was noted and his breathing power, so that he be allowed only such athletics that would do him good. Here many cases of "tobacco heart" are discovered and the warning given before too late. He said the young men of Y. M. C. A. are especially warned against harmful habits. They learn that any excess saps their vitality and they cannot win in the Olympic games if they indulge. They learn also the champion in a game of pool or billiards will not be the man of bad habits.

In appreciation of their instructor, the children gave a yell at the close of his speech crammed full of affection. They almost buried Professor Larimore in flowers, and then, capturing him, gave him a lunch up the canyon. This "big brother" has taught more than physical culture to the children. He has taught clean living and given an uplift that will follow them out in the world and help them to win life's battles.

Right in closing, could this town do a better thing than erect a building that might be used both for Chautauqua and Y. M. C. A. purposes? This would be especially helpful if we establish the Southern Normal School, and is worth thinking about.

MRS. M. M. EDMUNDS.

Dr. MacCullough of Medford made a splendid impression Friday morning when he spoke on purity in literature and art. He mentioned the great blessing a library can be in a community. When the young people read such books as "The Scarlet Letter" or "The Heavenly Twins" it uplifts them. But he denounced the tons of trash that are gathered up by some non-thinking library committees and form a sewerage that breeds disease of mind. He denounced the immoral show and the questionable picture. These things help to pollute our nation. As a result of carelessness the seeds of immorality are sown. In New York city 5,000 girls are arrested every night. How many mothers know where their daughters are after dark? Then it is that those seeds blossom out, and the girl disappears, and there is darkness unutterable in the home. Vice is sapping our nation. No longer can we point with scorn to the morals of France. Today the birth rate here is the lowest of any civilized nation. Disease has sapped our vitality, and we find, as in the city of New York, women wheeling little baby cabs in which repose beautifully curled poodles.

Sex hygiene must be taught, said the speaker, because our great nation has its reproductive force threat-

WATER TANK BURSTED

Southern Pacific Tank at Coles Collapsed Thursday and Blocked Track-Laying Trains.

The Southern Pacific water tank at Coles, a station on the Southern Pacific railway practically on the state line, collapsed Thursday afternoon and the company suffered the loss of a lot of water. As it did not come from the stocks the company is still solvent. The wreck of the tank, however, blocked the main track and it was necessary to send a wrecker over from here to clear it. All northbound trains were delayed about two hours that day.

There were 14 men working under the tank when it collapsed and it is almost miraculous that there were none of them killed or seriously injured. The tank is supported upon posts 14 feet high and when it collapsed it threw the tank itself to one side. The men had meanwhile dropped into the pump pit beneath the tank and even had the debris landed where the tank stood they would have escaped. Mr. Quinn, the foreman, was slightly injured and all the rest escaped entirely.

S. S. BASEBALL.

Schedule of Concluding Games of the Series is Fixed.

At a meeting of the managers of the Sunday School Baseball League held last Saturday evening it was decided to play the remaining games two a week instead of one a week, as heretofore. This was thought best on account of the fact that it gets dark earlier each week, which would soon cut the games too short. At the rate of two games a week the schedule will last just three weeks longer, and has been arranged as follows:

Tuesday, July 22—Methodists vs. Christians.

Friday, July 25—Christians vs. Baptists.

Tuesday, July 29—Congregationalists vs. Methodists.

Friday, August 1—Congregationalists vs. Baptists.

Tuesday, August 5—Baptists vs. Methodists.

Friday, August 8—Christians vs. Congregationalists.

For the present the custom of having the games free of admission will be continued. The hour will still be 6:30, and all are invited to attend. All who are to participate in the games are requested to be on hand a little before 6:30 in order that the game can be called promptly at that hour.

The league has decided to accept the challenge from the Grants Pass team for a game to be played at Grants Pass probably July 30, provided the Grants Pass league are willing to play a return game here. These games are to be played by teams picked from all the teams belonging to the league.

The game tomorrow (Tuesday) evening promises to be a very interesting one. The Methodist team has been greatly strengthened since they were defeated by the Christians, and are confident of wresting victory from the hitherto invincible Christian swatters.

HIS HAND IS BADLY CUT

J. H. Christenson Gets Hand in Collision With Power Ripsaw at Ayer's Spur.

J. H. Christenson, foreman of the Ashland Manufacturing Company's plant at Ayer's Spur, is in the Granite City Hospital with a disabled hand. He got it in contact with the power ripsaw in some way shortly after resuming work Saturday afternoon. He was hurried to this city by auto and the wounds dressed, and the doctors have strong hopes that the member will not be crippled by the accident.

Releasing a spring in the handle permits a new form of mop to be reversed to present a clean side for use.

Additional Local and Personal

Ruby Palmer left Thursday for Marshfield to accept a position as bookkeeper for the F. E. Conway Company.

F. E. Conway and family left Sunday for Marshfield, where they will spend the summer. The F. E. Conway Company will erect a large number of residences in Marshfield this summer.

G. W. and L. J. Trefren were in Jacksonville Saturday on matters connected with the Strickfadden divorce case. Frank Strickfadden was granted a divorce from his wife, Nan Strickfadden.

Attorney J. LeRoy Smith of Portland is visiting his sister, Mrs. T. W. Hill, of this city.

Scale receipts at Tidings office.

New shipment of Keen Kutter Kutlery, Pocket Knives, Scissors, Butchers, Kitchen Knives, Knives and Forks, Table Spoons, Tea Spoons.

These goods will be on sale on Wednesday morning, and we will continue the "Special Sale" for one week, giving 1000 votes on the Grafonola for each \$1.00 purchase.

Now, Girls and Boys, if you are behind in the Grafonola contest, induce your friends to buy Keen Kutter goods this week and get TEN votes for ONE. This will soon place you in the lead.

We want every one in the contest for the Columbia Grafonola, to call at the store every Wednesday, bring the votes for the week and have them recorded, and see us record all the votes left by your friends for you.

We have 1200 feet of garden hose on hand, left from our purchases of 15000 feet. This must be this season. We are not going to carry over a foot of it. You cannot afford to repair that old leaky hose or be annoyed with it when you can buy a new piece for the money we ask for it now.
