TALENT NEWS ITEMS.

The Misses Adamson entertained a number of their girl friends Saturday afternoon and a very enjoyable time was had. Light refreshments were served.
E. L. Kiser left a few days ago for Seldon, Kansas. Mr. Kiser has been working on the ranches around Talent the past year and many friends hate to see him go.
Mr. and Mrs. C. D. Borgan were Ashland visitors Tuesday.
Mrs. E. C. Gardner and little daughter went to Seattle the first of the week to visit friends.
The Talent Mercantile Company moved Monday into their new store in the Ames block. While some of their new fittings are not here yet, it is easy to see that they will have a handsome store and be better able than ever to handle their large trade.
—Something doing at Studio Ashland all the time. Don't fail to attend the opening. 75-tf

Phone news items to the Tidings.

DR. JOHN F. HART Physician and Surgeon TALENT, OREGON.

Shareholders Hold Meeting

A well attended and lively meeting of the shareholders of the proposed Talent creamery was held in the hall over the postoffice Tuesday afternoon. Mr. Hogmar, the promoter, has secured the necessary \$2,500 stock subscribed to build and equip the building and this meeting was called by him to have the shareholders select a committee of three to choose a site and look after the building of the creamery. It was evidently the intention of Mr. Hogmar to have the site selected and the contract let (incidentally to himself) that day, but the shareholders thought otherwise.

Peter Vandersluis was chosen temporary chairman of the meeting and Harry Simpson, representing the Talent Lumber Company, as secretary. There was considerable discussion as to whether the creamery should be a stock company or a co-operative creamery, the point at issue being whether or not there should in any event be dividends, over and above the fair interest on the investment, or whether it should be a profit-making affair. Practically every non-milk producing shareholder was present and were a unit in stating that their shares would be gladly turned over to any milk producer at any time, even without interest. The matter was finally passed upon by a motion to organize a co-operative creamery company.

A motion was made and carried that a committee of three be elected by the shareholders to consider site, investigate the plans and specifications presented and report to a later meeting.
Johua Patterson, Grant Davis, H. P. Houston, J. H. Fuller and C. M. Thomas were nominated. Mr. Thomas withdrew his name, believing that the committee should all be milk producers. Nevertheless he was within three votes of being named. Messrs. Patterson, Fuller and Davis receiving the highest number of votes. The committee immediately met and insisted that Mr. Thomas act with them that they might have the benefit of his legal knowledge and business ability.

The committee visited several sites, one having been offered free by Mr. Patterson, and will take up the matter of plans and specifications, estimates, etc., with the Oregon Agricultural College.

A meeting will be called shortly to consider their report.

Big Minstrel Show By Home Talent

The date for the big musical event in Talent has been set for February 24. The affair will be a high-class minstrel show with a good selection of solos and a chorus of about 30 people. The musical end of the program has been under the efficient and faithful supervision of A. S. Ames, who has been holding two rehearsals per week for several weeks, and they have achieved a high standard of work, as will be shown at that time.

The soloists are Messrs. Frame, Cochran, McPhail and Bonham, Messdames Hart and Frame and Miss Kirkpatrick.

The artistic Phoenix quartet will sing and the Elks quartet of Ashland, one of the best quartets in southern Oregon, will be heard in Talent for the first time.

C. M. Thomas will be interlocutor and has charge of the joke end of the program, which will necessitate the paying of special attention to waistcoat buttons.

Costumes, wigs, etc., have been ordered from San Francisco and the affair will be full dress. It will be emphatically the event of the season. Admission 25 cents.

Colds and Croup in Children.

Many people rely upon Chamberlain's Cough Remedy implicitly in cases of colds and croup, and it never disappoints them. Mrs. E. T. Thomas, Logansport, Ind., writes: "I have found Chamberlain's Cough Remedy to be the best medicine for colds and croup I have ever used, and never tire of recommending it to my neighbors and friends. I have always given it to my children when suffering from croup, and it has never failed to give them prompt relief." For sale by all dealers.

—The Tidings, Daily Oregonian (not Sunday), Sunset Magazine and McCall's Magazine, \$6.50. This bargain runs only to March 1. 73-7t

"When Dreams Come True"

There was recently on display in the window of the Warner Mercantile Company at Ashland a striking poster with the above legend. The lower portion represents a farm lad with a milk pail and a discontented look getting ready to milk a cow. Above was his dream of a machine which would milk, in the form of the Sharples milking machine. It was the good fortune of the Tidings representative to visit Houston Brothers' ranch near Talent and witness the workings of a two-unit milking machine of this make and it was certainly a revelation. The machine has been referred to as an electrical milking machine, but such is not the nature of the machine. In the instance of the Houston Brothers the power is furnished by an electric motor, but any constant speed power would do as well. The machine comprises two parts, the pumps and the milking attachment. The pumps are situated in the dairy house adjoining the barn, together with the electric motor and the separator. The pumps are two in number, or rather a double pump acting in unison, one creating an air pressure and the other a vacuum. The action of the pumps carries itself, through pressure pipes, and vacuum pipes and flexible rubber tubes, to the milking attachment, which consists of eight flexible tubes terminating in four small nickel cylinders with suction rings at the ends which slip up over the teats. When the pressure and vacuum are both turned on they work alternately, automatically bringing a suction and an upward pressure to bear upon the teats and udder. If you ever noticed, while a man milks down, the calf always milks up and bunts rather than strips the udder to secure the last drops of milk. Thus the alternate suction and pressure upward more nearly approach nature than human milking.

Houston Brothers have a two-unit machine; that is, a set of pumps with two sets of suction tubes. The writer forgot to state that the milk runs down the short tubes into a large-bottomed, small-topped pail, which is tightly closed, and which it is almost impossible for the cow to tip over should she step around. With a two-unit machine, such as Houston Brothers have, one man can milk 20 cows in an hour, and as they will have the separator coupled up to the same shaft as the pumps, when the milking is done the separating is completed, or practically so. Mr. Houston states that the machine is a perfect success, that while it is more practical to strip the cows a little, because of the fact that often one teat gives more than others, and to be certain that the cow is perfectly dry, that the mechanical method is not only more rapid but more economical and more sanitary. He states that he hopes in time to double his present herd of 34 cows and that then he will install two more milking units. The cost, exclusive of the motor, was \$350 for a two-unit machine.

This machine is, so far as the writer is able to learn, the only one in this part of the county, if not in the entire valley or southern Oregon, but it is safe to predict that it will mean much to the dairy interests of the state. When the owner of a herd of twenty cows can do the milking and care for the milk of 20 cows in two hours a day it goes a long way toward solving the help problem.

Houston Brothers started with a mixed herd but are rapidly building up a fine herd of Jerseys and will this week exchange the remaining Durhams in their herd for Jersey cows.

They are also the owners of the fine Buckeye orchards and are firm believers in the necessity of diversified farming.

It would pay anyone contemplating going into dairying to visit their ranch at milking time. The Tidings is not boosting this particular milking machine, but simply investigated it as something new to this section, and in fact to the dairy world, and finds it to be a success. There are other milking machines, we believe, on the market, but know nothing of their merits.

How to Prevent Bilious Attacks.

"Coming events cast their shadows before." This is especially true of bilious attacks. Your appetite will fail, you will feel dull and languid. If you are subject to bilious attacks take three of Chamberlain's Tablets as soon as these symptoms appear and the attack may be warded off. For sale by all dealers.

The Fact Remains

No amount of misrepresentation by the peddlers of alum baking powders, no juggling with chemicals, or pretended analysis, or cooked-up certificates, or falsehoods of any kind, can change the fact that

Royal Baking Powder has been found by the official examinations to be of the highest leavening efficiency, free from alum, and of absolute purity and wholesomeness.

Royal Baking Powder is indispensable for making finest and most economical food.

Oakland Man Buys Medford Property

H. O. Nordrick of Oakland, Cal., has traded property in Oakland and vicinity for Jackson county property to the value of not less than \$100,000, according to the Mail Tribune. The A. A. Davis flouring mill and residence in Medford and 500 acres of timber near Butte Falls are included in the deal. Mr. Nordrick will reside in Medford.

Let It Make You Fat.

When you buy a package of Samose, the great flesh former, weigh yourself and see how much you gain in the first week's use. McNair Bros. could tell of their customers who a month or so ago were thin, pale and haggard, but who are now, through the use of Samose, plump, strong and happy, with perfect health and attractive flesh. They have seen so many instances of the wonderful power of Samose to restore the weak and sick to strength and health and to make good, natural flesh that they give their personal guarantee with every package of Samose they sell to refund the money if it does not prove satisfactory.

Samose is a pure preparation, and can be used with absolute confidence by the most delicate. It builds up the thin, pale, puny girl and woman to plumpness and health. It is the only flesh former of its kind, and in addition it strengthens the organs of the body, restoring strength and health to the whole system.
