**New Mountain Drive Proposed**

Citizens can well be enthusiastic over the future of Ashland. We are just beginning to wake up to the fact that we have in and around our city more natural advantages than any other city in the United States, or maybe the world. We have springs, beautiful scenery, mountains, good roads, and everything else you might mention. Some, however, have to be developed. Our town is beautiful with trees, flowers and green lawns. When the springs are developed and people begin to come into the city, Ashlanders will begin to take a pride in their city and commence to spruce up. Everybody will then take pride in having perfect lawns and well-kept yards—the weed-grown lots will become a thing of the past.

A new undeveloped resource of Ashland has recently been discovered by progressive citizens—the building of a fine drive around the crest of Roper's Bunion. This drive is surveyed along the line of the old electric light plant's power line, starting up Ashland creek and following almost to the crest of the Bunion. The road will start at the First National Bank, go up the hill to East Fork street, then to Park street, back to West Fork street, which is surveyed to run along the old ditch line. Attorney Moore is now at work getting the property owners along the road line to deed over their half of the road, and all of them are willing—in fact, it was suggested by them to the city council. This drive will give a fine view, and it will be much appreciated by visitors. It will be through the trees, and be fine for autos as the grade will be practically level after autos once get up to it.

Fork street as yet has not been opened up or graded. Some of the promoters have thought out the idea of having a citizens' day, on which occasion all the citizens of Ashland will turn out and contribute their labor to the cause. Some have already offered their teams and labor for the work. If about 500 to 800 men could get on the road line at once they could make quite a showing in the work of getting the road started. The ladies could serve dinner in the park and it could be a general all-round community day. All the stores would be asked to close, so their proprietors could lame themselves up a bit.

This event, according to City Engineer Walker, could not take place very well for some time, as numerous matters will have to be attended to.

What will Ashland find next?

Paint your house. Help make it "Ashland the Beautiful."

**Herman Mattern Talks on Springs**

Herman Mattern is much interested in the outcome of the mineral springs project. He has visited most of the great watering resorts of the world. He has lived in Ashland for 21 years, not because he had his business interests here, but because he knew of no finer place in America for home life.

He says of the great European resorts, Carlsbad, Bad Nauheim and Bad Nelenar have waters similar to ours, but the climatic conditions, fertility of soil, conditions for home life, pastoral beauty, and scenic beauty of their surroundings and settings cannot in any way be compared to Ashland. Most of these places have no other charm but their medicinal waters. The topography of the environment is such that there is little room for town building at the springs, yet thousands of tourists a season visit them and leave millions of dollars. Ashland, with her splendid environment, and the whole valley as well, will be increased greatly in population by those drawn here primarily by our mineral waters, but, charmed by our natural environment, will become permanent citizens. This will not all occur in a day, but the population should be increased from year to year. It is the combination of our mineral waters with the other charms of this section that will attract permanent population. From time to time Mr. Mattern has entertained visitors here from Europe and from all parts of the United States, and in every instance they have grown enthusiastic over Ashland's splendid scenic and climatic situation. It is these as well as our waters that insure the success of the springs project.

The season at Carlsbad, Manitou Springs and Glenwood Springs in Colorado is short, yet at Glenwood Springs, for instance, the railroad has invested more than a million dollars in a tourist hotel and beautifying the grounds to accommodate tourists for but three months in the year.

These resorts, on account of their shorter seasons, do not afford nearly the opportunity for revenue that Ashland does, for our summer season is easy six months long, besides our winter season is already looked upon with such favor that six thousand people are delighted to live here the year through.

Should Ashland get one thousand tourists, coming and going, and they should average but \$2.50 each, some staying a day or two, others a month or two, it would mean to Ashland \$2,500 per day, \$75,000 per month, or \$900,000 per year. Is that estimate too high? Is that worth going after, as a purely business proposition? The citizens of Ashland will answer tomorrow in no uncertain way.
