

1915 Fruit Crop

Promises Well

Everything points to a record-breaking pear crop in 1915. While the frost danger has not passed by any means, there is reason to believe that there will be no "freeze," and present smudging facilities can take care of any reasonable drop in temperature. With March passed without any material damage, the consensus of opinion among local ranchers is that there will be little frost damage this season, although this feeling has not lessened the preparations to fight frost, by any means.

The largest previous pear crop in the history of the valley was that of 1913, when 425 cars were shipped. According to conservative estimates there will be at least 700 cars of pears shipped in 1915. Many ranchers predict 800—a jump to nearly twice the former record.

The Yellow Newtown crop looks a trifle short this year, and as the young trees coming into bearing are mostly pears the apple increase will be relatively small. In 1913, 561 cars of apples were shipped. This number will probably not be exceeded if it is reached in 1915, but the total in all probability of pears and apples will reach at least 1,200 cars, while the more sanguine predict 1,500.

FRECKLE - FACE

Sun and Wind Bring Out Ugly Spots—How to Remove Easily.

Here's a chance, Miss Freckle-face, to try a remedy for freckles with the guarantee of a reliable dealer that it will not cost you a penny unless it removes the freckles; while if it does give you a clear complexion the expense is trifling.

Simply get an ounce of othine—double strength—from any druggist and a few applications should show you how easy it is to rid yourself of the homely freckles and get a beautiful complexion. Rarely is more than one ounce needed for the worst case. Be sure to ask the druggist for the double strength othine as this is the prescription sold under guarantee of money back if it fails to remove freckles.

The Old Order Changeth

To be up with the procession in some lines means success; but in modern diagnosis, surgery, and medicine it means to be behind--and to be behind means to fail.

Last year's methods in surgery and medicine may be quite out of date. Why cling to them? The quest of the physician should be for more light today--to be used to gain still more tomorrow.

Whenever success is attained in diagnosis and treatment it is always at the sacrifice of the scientist, his constant experiment, and study.
