The new fire limit ordinance passed at Tuesday evening's council meeting provides for additions of corrugated iron to brick or stone buildings within the fire limits, providing the addition is to be used for porch or storage purposes.

The council is given enlarged power in condemning buildings and as a result the ordinance not only will cause many property owners to tear down old porches and sheds and replace them with new ones, but the council will feel justified in condemning several ramshackle sheds as the cost of a corrugated iron structure is not large.

In the past property owners were forced to replace sheds with brick or stone structures.

O. E. S., Attention.

Those wishing to go to Medford Wednesday evening, June 9, will please call up Mrs. S. G. Ewedenburg, H. L. Whited and R. L. S. Brown and let them know at an early date on account of arranging for transportation.

### Natatorium Open

For Summer Season

The Ashland Mineral Springs Natatorium opens tomorrow under the management of Hum Pracht. Mr. Pracht has made many extensive improvements in the equipment and has thoroughly renovated the building. The water will be warmed enough so that any one can enjoy a plunge without fear of after effects. Owing to the immense storage tanks under the dance floor, the water in the big tank can be changed in an hour and a half, and the water and tank will be kept scrupulously clean and pure. Hum has put in a soda fountain and will serve soft drinks and ice cream. The Natatorium under his management will be one of the best places in the city to go for a pleasant swim and a good time. A dance will be given Saturday evening with a big orchestra, and large numbers are expected from Medford and valley points.
