Hodgson & Reed report the cash sale of the May place, three miles east of town, from A. F. Berkley to W. S. Howard. The tract contains sixteen acres, and the Berkeley sulphur spring, from which water is piped to Lithia Park, is located upon it. The new purchaser formerly resided on Ashland street. In moving to this tract Mr. Howard will substantially improve the same.

Now is the time to install that gas range. The Gas Company, phone 193. 89-1t

Several fishing parties motored to Rogue river Sunday, but report little success at snagging the "big 'uns." One party who had a boat and anchored in the middle of the river had fine success, however, and hauled out steelheads with a regularity which made the bank fishermen green with envy. Messrs. Sargent, Graves, Pierson and Penniston composed one party. Harry Hosler, with the intuition which never fails him, sensed the fact that fishing would be poor, and joined a party which spent the day hunting agates.

He was attracted here by the prospects brought about by the mineral water development and says we have the best waters, best scenery, best air and best town he knows anything about. He had been over the state considerably looking for a location before he came here.

Good, heavy whipcord trousers $1.75, and Norfolk coat to match, $2.50. Mitchell & Whittle. 1t

Medford Tribune: Leander A. Neil of Ashland was in Medford today attending to business. He left for Jacksonville on business and will return home tonight. Mr. Neil, who for many years has engaged extensively in the livestock business, says stock has wintered well in that region. Most of those who owned stock had feed enough to carry them through the feeding season. The range promises to be better than for two years. Mr. Neil predicts that prices will be better, also, this year. The tendency now is upwards.

Silver collars are the very best yet for service and style. Absolutely none better, for 12½ cents each. Mitchell & Whittle. 1t

The physics class are doing experiments in light now. They are learning all kinds of seemingly impossible things about light. White light when shone through a prism breaks up into all colors; light travels in waves; light is about the fastest thing there is; light seems to do almost everything.
