### Owners Liable If Dogs Chase Deer

Superintendent Russell of the city electric light plant reported to the council Tuesday evening that he had seen dogs chasing the deer in the canyon and appealed to the council to take steps to prevent this. He stated that the deer had become very tame and rarely a day passes that the plant employees do not see some, but that if the dogs are allowed to chase them they will soon grow wild again.

Discussion of the matter revealed the fact that owners of dogs are liable to a heavy fine if they allow their dogs to run in the parks and must keep them in leash if they take them into the park at all. The Ashland parks include a 200-foot strip along Ashland creek to Watson's cabin.

The state game laws provide a heavy penalty to be inflicted upon the owners of dogs caught chasing deer.

Hence the owners are directly responsible for their dogs and should take precautions to see that they do not run loose in the canyon. No

shooting is allowed in Ashland canyon or on the Ashland creek watershed, the law also providing against hunting.

The city council will take steps to co-operate with the forestry officials in a determined campaign to put an effectual stop to chasing of deer by dogs, making several arrests if necessary. The tame deer in Ashland park and canyon are multiplying rapidly and the entire community should co-operate in preserving this unique asset.

### Will Elect Heads Of Roundup Tuesday

The Roundup Association met again Tuesday evening and several more shares of stock were taken. Moving the grounds to the Carter tract just across the railroad on East Main was discussed. The association will meet next Tuesday to elect officers. The following are members of a committee on by-laws: E. D. Briggs, E. J. Thornton and H. H. Gillette.

AND USE

### Printed Butter Wrappers

ACCORDING to the ruling of the Oregon Dairy and Food Commission all dairy butter sold or exposed for sale in this state must be wrapped in butter paper upon which is printed the words "Oregon Dairy Butter, 16 (or 32) ounces full weight," with the name and address of the maker.

To enable patrons of the Tidings to easily comply with this ruling this office has put in a supply of the standard sizes of butter paper and will print it in lots of 100 sheets and upward and deliver it by parcels post at the following prices:

- 100 Sheets, 16 or 32 ounces .....\$1.35
- 250 Sheets, 16 or 32 ounces .....\$1.85
- 500 Sheets, 16 or 32 ounces .....\$2.65

Send your orders to us by mail accompanied by the price of the paper and it will be promptly forwarded to you by parcel post, prepaid.

We use the best butter paper obtainable, and our workmanship is of the best. Let us have your order and you will not regret it.

### Council Works On High Gear

Harmony reigned supreme at the first August meeting of the city fathers held last Tuesday night. Getting off to a late start and with a huge pile of routine work to be gone through, the council worked like a well-oiled machine, and although threatening to wax facetious at the last, managed to get through by 11:30. While nothing of major import was transacted, many minor matters which have been hanging fire were cleaned up.

The reading of the minutes and the monthly reports of the various departments, with a few quarterly and semi-annual reports thrown in for good measure, and the authorization of the payment of the usual batch of bills, occupied the council's time until after 9 o'clock. There was an almost total lack of citizen spectators, either the hardness of the city benches or the attraction of a perfect evening keeping the "common peepul" down out of the council chambers.

Inquiry into the cost of remodeling the old jail room, now used as a storeroom for the electrical department, will be made as the result of discussion of making an office room of it.

Fifty dollars was donated from the publicity fund toward the entertainment of the State Editorial Association.

A requisition from the superintendent for supplies was favorably received, as was also a requisition from the superintendent of the city dump.

The resignation of F. E. Watson from the park board was accepted without discussion.

A requisition for the purchase of a barrel of paint to coat the pipe on the trestlework above the power plant was allowed.

Mrs. R. C. Morris petitioned that the council move a telegraph pole four feet at the rear of her residence property, so that she can build a garage. The matter was referred to the street committee with power to act. Mrs. Morris' residence is at 568 East Main street.

G. W. Gregory complained against the Hotel Austin for allowing waste waters to run down past his door. The matter was referred to the sanitary committee with power to act.

The recorder was authorized to advertise for bids for the construction of the proposed sewer in the Laurel-Helma street district.

Bids for the construction of a concrete culvert on the Boulevard at the Ashland street crossing were read. A. L. Irwin's bid of \$84 being the lowest, he was awarded the contract.

Mr. Nininger drifted in at 10:30 looking all dressed up and no place to go.

Paul Guiley's request for his annual vacation, to commence August 15, was granted.

On recommendation of the water committee the Hotel Austin's water rent was placed at \$13.70 and Sander's Dairy was given a rate of \$2 for dairy purposes.

The mayor was given permission to be absent from the city for three or four days, commencing August 6.

On motion of Mr. Banta the street committee will go out and walk over a board walk on Fifth street.

A transfer of \$600 from the electric light depreciation fund to the general fund was authorized, the general fund being short of cash until the next bunch of tax money comes in.

The ordinance committee was instructed to investigate ways and means of prohibiting loose dogs in the canyon, following remarks by Mr. Russell on the subject of dogs chasing deer. Dogs in general and Editor Wolf's dog in particular were discussed for a happy half hour.

Resolution providing for the assessment for the cost of the Granite street curb was passed.

### ORIGIN OF "BUNCOMBE."

How a Colonel's Name Came to Be a Term of Reproach.

Whenever I pick up a copy of the Congressional Record and numerous other publications and read the irrelevant speeches therein reported I sigh for the memory of Colonel Edward Buncombe, "Girard" writes in the Philadelphia Ledger.

Through no fault of the gallant gentleman himself, there clings to his name an unpleasant significance which many of our brave public men do naught to mitigate. Indeed, if there be such a thing as one shade's taking vengeance upon another in the future world Colonel Buncombe will at least pull out Felix Walker's tongue.

It was all Walker's fault that "buncombe" became a term of reproach, and the incident which made it so happened a century ago.

Walker represented in congress a district of North Carolina of which Buncombe county was a part. The county had been named away back in 1791 in honor of Colonel Buncombe.

Walker was one of those long distance orators who without half trying could empty the halls of congress and put them in a condition beside which the dead streets of Pompeii appear great white ways. When upbraided one day for talking about everything except the question at issue Walker used this immortal phrase:

"I am only talking for Buncombe," meaning his home county.

And so "buncombe" became a new word in our language, which has been conveniently shortened into the colloquial "bunk."

### MAN'S DECREASING HEIGHT.

When Adam and Eve Walked Around They Were as Tall as Trees.

It was a French savant named Henrion who 200 years ago gave to the world authoritative statements as to the height of Adam and Eve. He said that the father of the race was 123 feet 9 inches high and Eve 118 feet 9 inches. He noted that from the creation of these enlarged editions of humanity degeneration had been rapid; that Noah was only twenty-seven, Abraham only twenty and Moses but thirteen feet in height.

According to this French authority, if the Christian dispensation had not arrested this decrease man by this time—200 years ago—would have been a mere microscopic object, and we may conclude that by our time he would not have been at all. M. Henrion did not give any explanation as to how he arrived at his estimate of the height of these ancients.

Perhaps the most gigantic story on record is that concerning an immense skeleton, said to have been in Sicily, which measured 300 feet in length. This story, however, carries its own refutation, as it is said that found beside this giant was his walking stick, which was thirty feet long and thick as a telegraph pole. A clever calculator made the estimate that a walking stick only thirty feet in length for a man who measured 300 feet would be as ridiculous as one of seven inches for a man of ordinary stature.—Indianapolis News.

### A Story of the Bastille.

In the year 1785 a haughty noble of the ancient regime of France fell in love with a beautiful girl, the daughter of a wealthy tradesman of Paris. The latter, refusing to encourage the nobleman's passion, was soon after thrown into the Bastille. The sweetheart of the girl, who was to have married her in a few days, dreading a like fate, made his escape to Constantinople to serve as a volunteer under the grand seigneur, leaving his intended bride secreted with a woman friend. On the outbreak of the revolution the young man returned to Paris and was the very grenadier who first mounted the breach made in the Bastille, from the dungeons of which he had the happiness of rescuing the father of his future bride.

### Soap and Hard Water.

The hardness of water is measured by degrees. When a gallon contains one grain of lime it is said to have one degree of hardness. When soap is used with hard water about two and one-half ounces of it to each hundred gallons of water must be used for each degree of hardness just to overcome hardness. It combines with the lime, forming a mineral product, and not until enough soap has been dissolved to overcome all the hardness does the soap do any good for cleansing purposes.

### Brazilian English.

"The river of Parana," declares the prospectus of a real estate agent in Parana, Brazil, "is the most watery in the state, one of the most extended in the world, it is navigable until to this state for ships of great profundness; it is also sufficiently fishful." The same cheerful chap it is who further asseverates that "the vegetable reign is successfully represented in resinous, oily and gummy plants."
