Celebration Com. Gets Busy Early

The Commercial Club committee appointed to arrange for the celebration to be held in Ashland next summer held their first meeting in the Commercial Club office last Friday evening and a great many of the preliminary arrangements were disposed of in a businesslike manner.

are H. O. Frohbach, chairman, Frank Jordan, secretary, Louis Dodge, Harry Hosler and A. E. Kinney. Most of the members have had experience in celebration matters and the newer members, Louis Dodge and A. E. Kinney, were appointed for their qualifications and enthusiasm along these lines.

It was definitely decided that July 3, 4 and 5 would be the most suitable dates this year, and it is up to the citizens of Ashland to keep them in mind. A preliminary circular will be prepared by the publicity committee as soon as more definite information is obtained as to attractions that will be offered, and it is the desire of this committed that not a letter will leave Ashland without one, in order to give the event the greatest amount of publicity and as early as after the appropriation bill in which

for the entire three days' festivity was not decided upon, but a prize of \$2.50 cash to the school children of Ashland for the best name will be awarded as noted elsewhere in the columns of this issue.

G. G. Eubanks was selected to act as treasurer this year, and all subscriptions will be payable to him. Letter paper, envelopes and subscription blanks were ordered printed, and in a very short time the solicita-

Normal Saved At Session's Close

An incident of the last night of the legislative session had a large significance to the Ashland normal school.

By way of protecting the legislation put through at the session, much of which was important, the Moser-Stanfield organizations determined to call a special election at which any piece of legislation on which the referendum was involved should be submitted to the people. Thus a year and a half in time could be saved in road bonding measure was the principal factor in bringing this about.

put through the senate late Monday night, after it was known that the road bond bill would pass with a referendum clause attached. This bill to the people by the twenty-ninth legislative assembly and all acts on which the referendum was invoked" should be preesuted at a special election to be held next June

It went over to the house about midnight. Representative Sheldon had been over in the senate looking was included an item of \$420 for repairing the roof on Ashland's normal He returned to the house as S. B. No. 318 was being read, and caught the fact that all measures, including his resolution for two more normal schools, were to go on the ballot at a special election in June. which would mean its certain defeat (with no time for a campaign). Sheldon promptly got the floor, but instead of speaking, went up to the speaker's desk and began explaining the necessity of putting the normal school matter over to the 1918 election. Representatives Forbes, Callan followed him to the speaker and put in a vigorous protest against any mittee already worn out by the change meant keeping both houses in The speaker decided against Sheltion and insisted that the bill, No. 318. be put through without change and at once. Forbes got the floor, snoke for the bill and moved the previous question. The steam roller was in

Sheldon demanded recognition and was ruled out of order. He persisted so vigorously and sharply, ignoring the raps of the speaker's gavel that of the transfer of amounts from city a general confusion resulted, the members crowding up about the chairs of Sheldon and Forbes, both of which were well to the front and in the center of the house. In a lull, and without recognition by the chair, Sheldon started such a plea for his normal school measure that in a few minutes he had member after member shouting "yes" and "that's right." Forbes, realizing his bill would be beaten unless he conceded Shelden's point, changed his motion to one for a "committee of the whole to amend," and the bill was amended certain if it could legally make use so as to except from its provisions the normal school measure and one other.

> Had this change not been secured, the measure would have doubtless gone down to defeat, which would more normals for at least four years. As it is, the measure is in better shape than before, as the many other measures referred to the people will be disposed of at the June election. leaving the ballot comparatively clear for the normal measure at the 1918 election. A large number of measures mitigates against each one.

Snow sliding off the roof of the
